About us:

Enabling Education Programs prepare students for undergraduate study by developing their knowledge of the university environment and its academic expectations as well as some discipline specific knowledge. Enabling programs develop students' cognitive, communication, academic literacy and independent learning skills.

The National Association of Enabling Educators of Australia (NAEEA) is an association of enabling educators and practitioners established as a collective of like-minded professionals and institutions for the purpose of collaborating on issues of common interest and relevance to enabling education.

NAEEA has grown out of two decades of networking of enabling educators from regular conferences and events both here in **Australia and in New Zealand.**
