Acknowledging Community in Presentations

Requirement 1: We request that all presenters acknowledge the participant's involved in the studies at the beginning of the presentation. If your research is about people who inject drugs and involves gathering data, lived experiences, biological samples or other aspects from the bodies or lives of people who inject drugs and participation of people who inject drugs has influenced your work, we encourage you to consider and build upon the examples provided below:

Example: "I want to begin by acknowledging and thanking the community people who have generously participated in this research."

Requirement 2: When developing your presentation, we also request that presenters outline how your work has had/ can have a positive impact on the community including key population groups e.g. First Peoples, People Who Inject Drugs (PWID), Culturally and Linguistically Diverse (CALD) and what steps are being taken to take the research into practice.

Disclosure of interest

Presenters are **REQUIRED** to include a disclosure of interest slide in their presentation. The Scientific Advisory Committee recognises the considerable contribution that industry partners make to professional and research activities, and we value these greatly. We are also looking at ways to increase opportunities of transparency for disclosing conflicts of interest and to make this as transparent as possible for presenters. One common way of doing this is to acknowledge these relationships in publications and presentations. Disclosures should relate to the substance of the research being presented, declaring any relationships and potential conflicts as part of each presentation you make.
