## CONFERENCE ENVIRONMENT POLICY

ASHM Conference and Events Division  
implements a waste-reduction policy that  
addresses:

- Reduce, Reuse, Recycle. This is done  
before, during and after each conference.
- ASHM Conference & Events Division  
reduces the number of printed materials  
by using electronic communication  
means wherever possible, including the  
website, email, online registration and  
abstract submission.
- ASHM Conference & Events Division  
monitors final delegate numbers  
for an accurate forecast of catering  
requirements in order to avoid waste.
- ASHM Conference & Events Division aims  
to research and prioritise purchasing  
items and equipment that support the  
use of recycled materials or can be  
recycled after use.
- ASHM Conference & Events Division  
will aim to ensure that recycling bins are  
available onsite at all events.
- ASHM Conference & Events Division will  
endeavor to minimise travel through the  
use of teleconferences instead of face-  
to-face meetings and holding meetings  
only when necessary.

ASHM Conference & Events Division  
encourages all conference stakeholders to  
consider the environment by suggesting the  
following: reduction in printing requirements;  
recycling conference materials; and reusing  
conference merchandise.
