

## HIV response in PNG. Are key populations being reached?

Angela Kelly-Hanku | 8<sup>th</sup> November 2017

### Are key populations being reached?

- No
- But also yes....
- it all depends on where and who we are talking about

Cannot be reached where we aren't working so  
there always needs to be a realistic assessment  
that not all KPs can or will be reached through KP  
programs

And a matter of definition....

What we call "them" has changed  
Who is a key population has changed  
Who "we" thought they were has changed  
How "they" describe themselves has changed

## **A matter of perspective**

Reached in KP programs where there are  
recorded as such and therefore contribute to  
"targets"

OR

Reached through other more integrated  
programs that don't record "KPs" or where  
they would never be even identified as such
