### PROGRAM ACKNOWLEDGEMENT

*Support for this Project was provided through funding from the UNITAID as part of the multi- countries project: Enhancing access to COVID-19 test, isolate, care and treat interventions within healthcare systems in LMICs. The project was delivered in 2022 by the Clinton Health Access Initiative, and the Lao PDR Ministry of Health- National Center for Laboratory and Epidemiology. The views expressed by the authors do not necessarily reflect the views of the funding agency.*
