Launch of the (English-language) online HIV JUSTICE Toolkit

In October 2017, we launched the **HIV Justice Toolkit**, which aims to support advocates to oppose HIV criminalisation at all levels - from educating communities and lawmakers to defending individual cases.

The **Toolkit** is a comprehensive compendium of almost 300 documents and videos, organised under twelve main headings, each of which is broken down into further subsections. The entire Toolkit is also searchable by keyword.

Although the Toolkit is currently only available in English, where documents already exist in other languages, these are included, and a French version is due in 2018.
