

HepLink Australia (formerly the National Hepatitis Infoline) Providing better access to nationally coordinated, localised, no cost, community and needs based support anywhere in Australia

Kudell M, Abrey J

HepLink Australia

(formerly National Hepatitis Infoline)

HepLink

DATA: A national community hepatitis service delivery data set capable of providing insights into service utility, service user demographics, viral hepatitis information and support needs, service types provided and client satisfaction.

HepLink Network

HepLink Network - other health and social service / providers recruited to support seamless health journeys for those affected by viral hepatitis, their families and friends.
