

ISSUES AND ACCESS TO LARC METHODS IN HOMELESS AND MARGINALISED POPULATIONS

Anna Chaney¹

¹ General Practitioner, Homeless Health Care, Western Australia

This session will explore issues surrounding the provision of LARCs for homeless and marginalised patients. It will utilise case studies to discuss:

1. Barriers for obtaining contraception in general
2. Special considerations for this population
3. Benefits of LARCs in this population
4. Overcoming barriers to access and supporting marginalised patients in contraceptive choices.
