

International Conference on Health and Hepatitis in Substance Users Late Breaker Abstract Guidelines

INHSU welcomes submissions of late breaker abstracts for original contribution to the field in the following scientific themes.

We encourage submissions that:

- Highlight specific characteristics or sub-populations (e.g. gender, age)
- Are from low and middle-income country settings

Theme	Explanation
Epidemiology and Public Health Research	Abstracts will present research on the social, cultural, environmental, occupational, and economic factors that determine health for people who use drugs.
Clinical Research	Abstracts will present research that seeks to improve the prevention, diagnosis, and treatment of disease and injury in people who use drugs.
Social Science and Policy Research	Abstracts may include empirical or non-empirical (conceptual/theoretical) studies which focus on social, structural, cultural, material and policy contexts. They may include evaluations of policies, analysis of policy making processes, analysis of stakeholders to policy, and analysis of policy statements.

Presentation and Workshop Types

The highest ranked abstracts following peer review will be offered Oral presentations. Where possible, presentations with a similar theme will be grouped together.

Presentation Type	Time Allocation	Explanation
Research – Based Oral Presentations	10 minutes presentation and 5 minutes of question time OR Short Oral 3 minutes presentation and 2 minutes question time	Oral presentations on original research findings, case studies, completed projects and theoretical analysis. Presentations should be well structured, rigorous and demonstrate novel contribution to knowledge, to theory and/or practice.
Poster Presentations	Permanently displayed during the Conference	A poster viewing session will take place for delegates to discuss the posters with their authors.

Keywords

The following keywords are to be used to assist with appropriate allocation of reviewers. Please select from the following:

- Bacterial infections and wound care
- Biomedical Sciences (e.g. laboratory-based)
- Biostatistics
- Cascades of care/linkage to care
- Clinical Sciences
- Community engagement
- Diagnostics and testing
- Drug policy
- Drug treatment
- Drug Use
- Education
- Indigenous health
- Harm reduction
- Health Economics
- Health Services and Systems
- Hepatitis B
- Hepatitis C
- HIV
- Law and human rights
- Lived and living experience
- Mobile outreach
- Modelling
- Nursing
- Opioid Agonist Treatment
- Other
- Prevention
- Primary care
- Prison / Correctional Health
- Reinfection
- Safer supply
- Tertiary care
- Tuberculosis

Selection Criteria

Abstracts will be favoured at review if they incorporate:

- Original data of high quality
- An analysis that extends existing knowledge
- Showcase an innovative model of care / program / intervention

In balancing the program, the committee may require authors to present their work in an alternate format (e.g. as a poster or oral poster presentation rather than oral abstract presentation).

Epidemiology, Public Health and Clinical Research Abstracts

All abstracts will be reviewed by three independent peer reviewers.

All abstracts will be provided a score out of 20 points based on the following criteria:

- Background and clarity of objectives of the study (1-5)
- Appropriateness of the study design and methodology (1-5)
- Appropriateness of the study results (1-5)
- Conclusions and significance of contribution (1-5)

Social Science and Policy Research Abstracts

All abstracts will be reviewed by three independent peer reviewers.

All abstracts will be provided a score out of 20 points based on the following criteria:

- Background and clarity of objectives (1-5)
- Quality and appropriateness of approach (1-5)
- Quality of analysis or relevance to policy or practice (1-5)
- Conclusions and significance of contribution (1-5)

Preparation Guidelines

Epidemiology, Public Health and Clinical Research-Based Abstracts

- Background: A description of problem or study rationale, study objectives, or hypothesis tested
- Methods: The method employed or approach taken
- Results: In summarized form, must include data but do not include a table. The results can also include one graph or figure.
- Conclusion: A brief description of the main outcomes of the study. Include knowledge or insight that conference attendees will gain from the presentation, explanation of how conference attendees can apply the skills and/or knowledge within their communities and how the study contributes to evidence-based knowledge

Social Science and Policy Research-Based Abstracts

These abstracts may use the above headings, or the following (as appropriate):

- Background: description of the problem
- Approach: theoretical underpinnings and approach to analysis
- Analysis: Main arguments, findings or outcomes
- Conclusion: Knowledge or insight that conference attendees will gain from the presentation, explanation of how conference attendees can apply the skills and/or knowledge within their communities and how the study contributes to evidence-based knowledge

Submission Guidelines

Abstract Preparation Guidelines for all Submission Types

There are two abstract templates available to be downloaded, please ensure you use the correct one depending on the type of presentation you are submitting:

1. [Epidemiology, Public Health and Clinical Research Template](#)
2. [Social Science and Policy Research Template](#)

All abstracts must:

- Use Calibri 11-point type only
- Use single line spacing only
- Format – Microsoft Word (.doc or .docx) file only
- Leave one line between paragraphs
- Specify all abbreviations in full at the first mention, followed by the abbreviation in parentheses, thereafter abbreviation only should be used
- Be written in English
- Checked thoroughly for spelling and grammar
- Not include references
- Maximum 300 words

All abstracts must include:

1. TITLE: in BOLD and UPPERCASE at the top of the abstract
2. Authors:
 - Principal author to appear first
 - Underline the name of the author who will be presenting the paper
 - Use surname followed by initials (do not use full stops or commas between surname and initials)
 - Omit degrees and titles
 - Use superscript numbering after the author's name to indicate affiliations
3. A Disclosure of Interest Statement

The International Network on Health and Hepatitis in Substance Users (INHSU) recognise the considerable contribution that commercial partners make to professional and research activities. We also recognise the need for transparency of disclosure of potential conflicts of interest by acknowledging these relationships in publications and presentations.

Please include a disclosure of interest statement in your abstract for any contributions received relevant to this work. Please see the example below:

"Dr Smith has received funding from Metabolism Corp. No pharmaceutical grants were received in the development of this study."

Note: If accepted into the conference program, you will be requested to include a disclosure of interest slide at the start of your presentation (e.g. slide 2) or include such statements in your poster.

Online Abstract Submission

Abstracts must be submitted electronically through the online submission site. You can access the site via the conference website. You will be required to enter:

- Preferred presentation type
- Authors' and/or presenter names (indicate presenting author and contact details: address, telephone and email). *Note:* Abstract / workshop presenters will be required to fund their own attendance at the conference and should not submit an abstract / workshop submission if this is not possible. Scholarships are available however, authors should ensure they are able to fund their own travel if need be
- Authors' affiliations
- Abstract title
- Abstract as a word document (maximum 300 words) plus a disclosure of interest statement
- Short biography of presenter (maximum 50 words). This information will be used by the session chair for introduction purposes and may be published in conference literature

Please contact the Conference Secretariat conference@inhsu.org or +61 458 291 166 if you are unable to lodge your abstract via the website or if you have any queries. We recommend using Firefox, Google Chrome or Safari as your browser to access the online submission site.

By submitting an abstract all authors agree to release the license to the Conference organisers and give permission to publish the abstract in the conference handbook, website, application, USB key etc. and in so doing certify that the abstract is original work.

Note: If your abstract does not conform to the guidelines, including if it is over 300 words in length, it will be returned to the submitting author to revise.

AI Declaration for Abstract and Scholarship Submissions

As part of our commitment to transparency and ethical standards in research and professional development, INHSU requires that all conference abstract and scholarship submissions include a declaration regarding the use of artificial intelligence (AI) in the development or creation of the submission materials.

Using AI to entirely generate your submission is not an acceptable use of AI. The majority of the submission must be written by you.

Please answer the following declaration questions:

1. Has AI been used in the preparation, drafting, or editing of any part of this submission, including data analysis, or language editing? (Yes / No)
2. If AI was used, please describe its specific role. For example:
 - Drafting content or summaries
 - Data analysis
 - Language editing or translation
 - Other (please provide detail)

Note: Submissions that use AI are eligible for review, but submissions without an AI declaration or those that contain unacknowledged AI-generated content may be subject to disqualification.

Awards

INHSU Trainee Awards will be provided to the top-ranked PhD student abstract in each theme (Epidemiology and Public Health Research, Clinical Research, Social Science and Policy Research, and Models of Care and Programs).

INHSU Early-Mid Career Awards will be provided to the top-ranked EMCR (within 10 years of finishing your latest degree) abstract in each theme (Epidemiology and Public Health Research, Clinical Research, Social Science and Policy Research, and Models of Care and Programs).
