Prescribing authority	< 2017: Only Hepatologist	2017 onwards: Hepatologist and Trained Internist
Provinces	2017: 7 provinces	2018: Additional 7 provinces (total: 14 provinces)
Patients on Sof+Dac	2017: 2000	2018: 4200
Special setting		2018: MoU with Department of Correctional Facilities
Investment case analysis	2017: Data collection	Finalized 2018. The only ICA for HCV in Indonesia
GeneXpert (≥ 4.6 version)	20	346

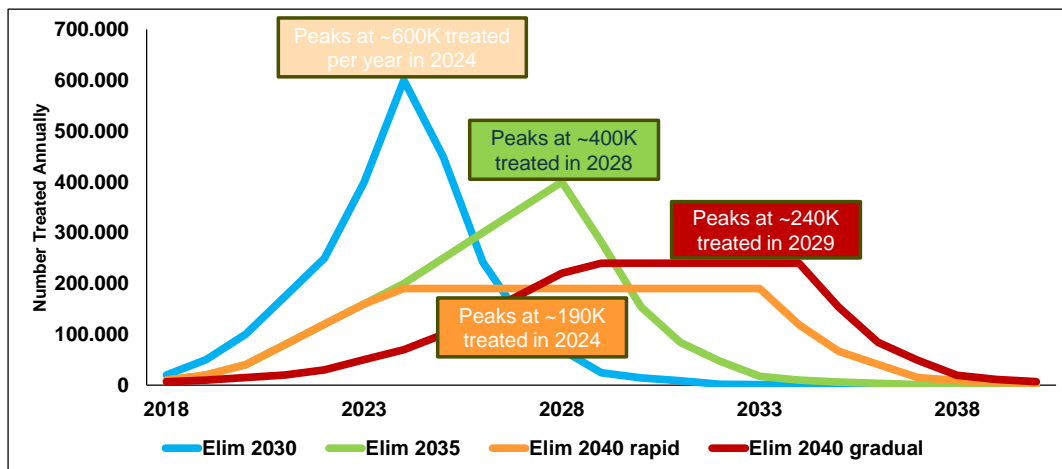

- ✓ DAA
- ✓ Trained Internist can prescribe DAA
- ✓ HIV/HCV Community involvement

Elimination is possible either by a rapid scale-up to 2030 or by a gradual scale-up to 2040

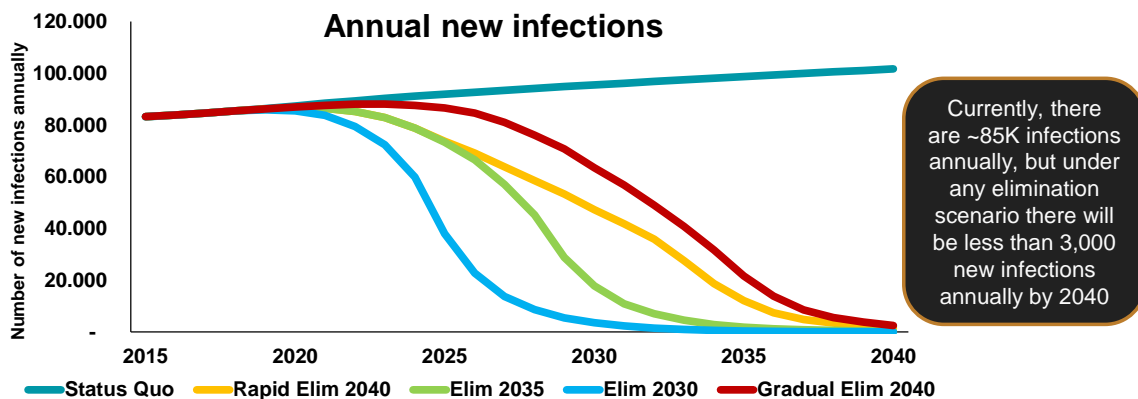

Scale-up scenarios

All elimination scenarios require 2.6 M cumulative individuals to be treated but differ in how quickly scale-up is achieved

HCV elimination will prevent at least 1 million new infections

Epi Impact
