

NSP Minimum Data Set Project Overview

Health
South Eastern Sydney
Local Health District

15th Australian Viral Hepatitis Conference

5 minute oral presentation

Abstract Session - Innovative Models in the Delivery of Viral Hepatitis Care

Thursday, Aug 7, 2025

11:30 - 13:00

Ballroom 3

PRESENTER

Eliza Van Der Veer
Kirketon Rd Centre
SESLHD

AUTHORS

Peta Farago,
Gemma Cameron,
Nicholas Rich
Kirketon Rd Centre
SESLHD

Trevor Slattery
Far West NSW LHD
Dr Phillip Read
Sexual Health and
BBV Services
SESLHD

Bianca Prain,
Annabelle Stevens
NSW Ministry of
Health

Disclosures

This project was funded by NSW Health.

I am presenting on behalf of my colleagues who were unable to attend VH2025

I have received an ASHM Scholarship to attend

Dr Phillip Read has received research funding from Gilead Sciences, as well as institutional and individual honoraria from Gilead Sciences, Abbvie and MSD.

No pharmaceutical grants were received in the development of this study.

– Project rationale

A need to review data collection at needle-syringe programs (NSPs)

1

Current NSP data collection has room for improvement

2

Recognising the current and future value of the NSP beyond needles and syringes distributed

3

There is an opportunity to streamline data-collection processes, and to feed-back data to NSPs in real time

4

Collecting data at NSPs - an opportunity for better engagement, or a potential barrier to use of the service?

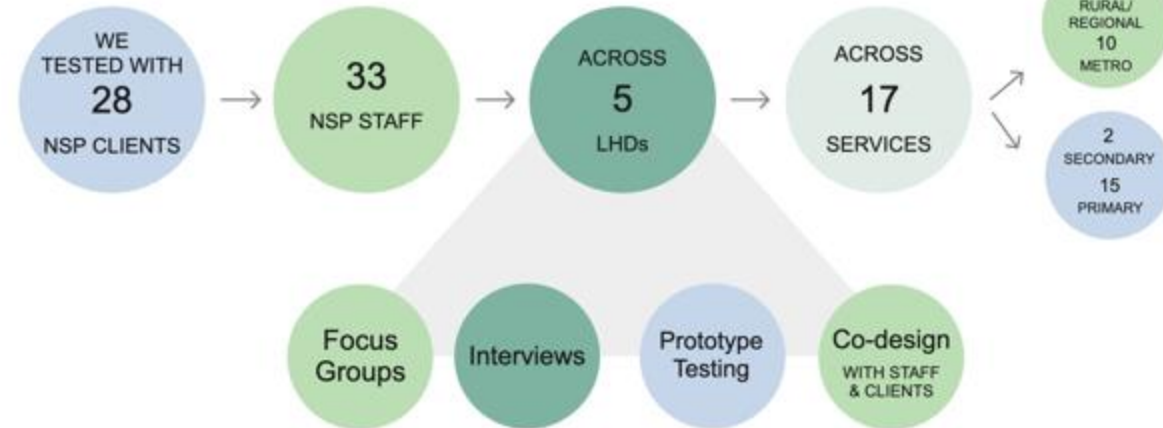

- Methods and approach

Stakeholder consultations and testing of *NSP minimum dataset* proposal

CONSULTATION

TESTING

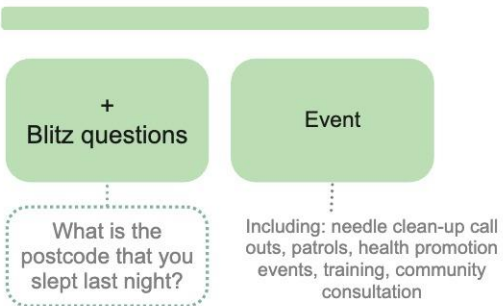

– Project recommendations

An online platform with real-time data collection and reports

National NSP requirements

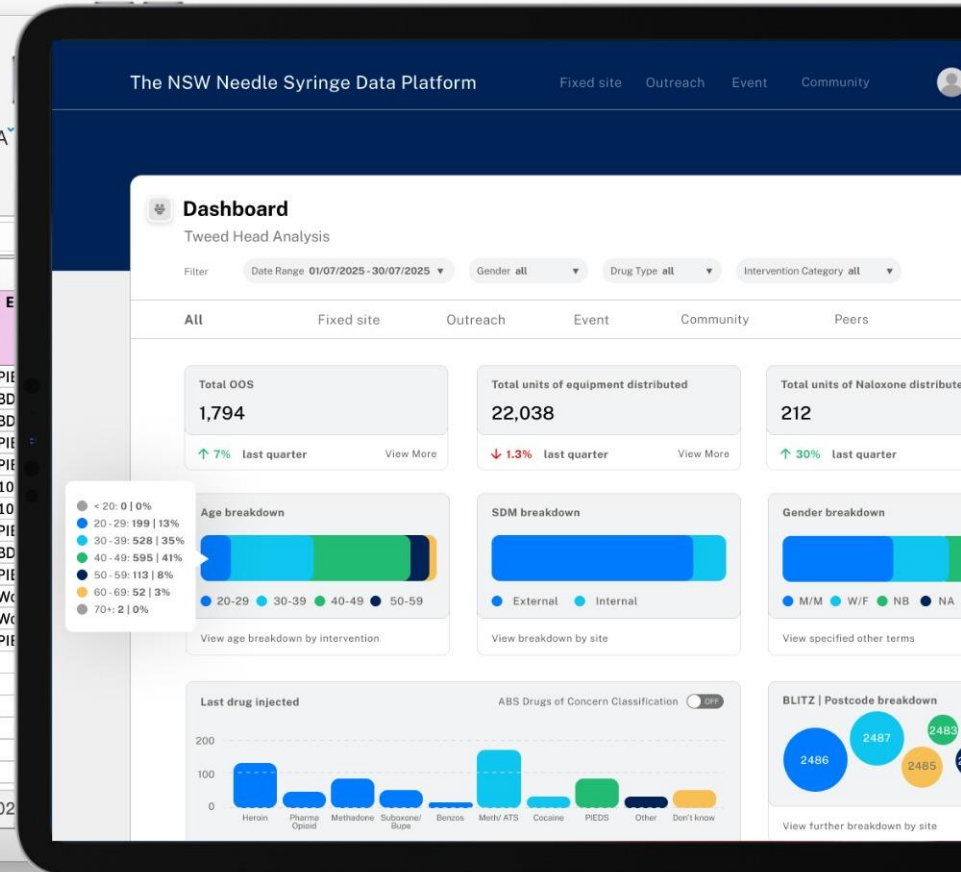

Additional NSW specific information

An example of a spreadsheet that could link to Power BI

An example NSP data prototype

– vh2025

Key actions and takeaways

- ▶ Standardised data collection that can ensure visibility of the scope of NSP work
- ▶ More useable data sets accessible in real time that can improve NSP service delivery
- ▶ After a robust consultation, we now have a model of a NSP minimum dataset ready for pilot and implementation
