

# Create change with the A-Plus Program

The A-Plus Program is a 10-week professional development program that equips managers, people and culture, and diversity and inclusion professionals with the capability to create sustainable and meaningful change for Autistic people across the employee lifecycle.

Its blended approach enables participants to build knowledge at their own pace, and then develop practical, actionable strategies through facilitated workshops.

- ✓ Designed and informed by lived experience
- ✓ Customised workshops that tailor content to your organisation's context.
- ✓ Showcase your organisation's commitment to neuroinclusion through A-Plus Connect - the platform that connects A-Plus employers with Autistic job seekers.

## Building awareness with our instructor-led training

### Creating Autistic Inclusion in the Workplace (2-hour)

Empower employees to contribute to an inclusive workplace environment by:

- Building an understanding of the Autistic experience in the workplace.
- Learning how small, everyday actions can create a more inclusive and productive environment for everyone.

### Managing Neurodiverse Teams (2x 2-hour or 4-hour)

Specifically for managers and P&C professionals, this program helps participants gain confidence to lead and support mixed neurotype teams through:

- Identifying and challenging assumptions, and unwritten workplace norms.
- Using the A-Plus Framework to explore practical strategies for positive change.
