

## Evidence-Based Mental Health Care

We're committed to getting mental health care right for every patient, every time. Through infusion therapy, psychology, and psychiatric assessments, we take a trauma-informed, collaborative approach grounded in research and innovation. Our partnerships with globally respected universities and institutions keep us at the forefront of evidence-based practice, so the communities we serve benefit from the best of what the field has to offer.

### Veteran Services

Offering DVA claim support, psychiatric assessments and more, delivered with care and with no out-of-pocket costs to veterans.

### ReviveMed

Specialist ketamine infusion therapy, designed to support people living with treatment resistant depression, PTSD and anxiety.

### Specialist Centre

Trauma-informed psychologists available for in-person appointments in Canberra, and via telehealth anywhere in Australia.

## Why Work With Us

**Established, long-term provider:** With a strong history of delivering specialist mental health programs, including +50,000 episodes of care, we are trusted and supported by DVA and aligned with recognised care pathways.

**Safe, trusted clinical programs:** Our ReviveMed ketamine infusion therapy is delivered in a hospital, prioritising patient safety, clinical governance, and continuity of care.

**Multidisciplinary teams: & collaborative care model:** Our psychiatry, psychology, and allied health teams collaborate closely; not only with each other, but with referring GPs, psychiatrists, and treating teams to deliver integrated, whole-person care built on shared decision-making and clear communication.

**Program-led psychiatric oversight:** Select programs are supported by experienced program psychiatrists, with access to interventional psychiatry when clinically indicated, as well as education and support for referring clinicians.

## How to Refer a Patient

---

We work with clinicians, advocates, and organisations across a range of referral pathways. Our intake team guide you and your patient through the process to ensure the right services are identified quickly based on their individual needs.

Referrals can be submitted directly to our intake team.
