

# We deliver projects for purpose

Yellow is a management consultancy with specialist expertise in the disaster and emergency management sector that began with its involvement in supporting the establishment of the Queensland Reconstruction Authority (QRA) in 2011/12.

At Yellow, we believe project management should be about innovation, collaboration and impactful results. Our brilliant team of strategic thinkers, creative leaders, and process executors have experience working across all levels of government, corporate entities, small businesses, and not-for-profit organisations. Our passionate and dedicated people have knowledge and capability accumulated from multi-decadal work and thrive on making a difference — one project at a time.

We've worked with local and state governments in response to more than 100 activated disaster events to support disaster-impacted communities and strengthen their resilience against future disasters. Our passion lies in delivering quality and innovative solutions across all stages of disaster management. This includes prevention, preparedness, response and recovery, as well as reconstruction and resilience — ensuring quicker recovery and a safer future.

At Yellow, we work with key stakeholders to empower communities with comprehensive disaster management solutions — focusing on prevention, preparedness, response, and recovery projects to build sustainable and resilient futures.

## Resilience

Project Management

	Prevention	Preparedness	Response	Recovery
Policy and processes	<p>Develop action plans linking risk reduction and mitigation projects to potential funding sources.</p> <p>Create resilience and risk mitigation project registers related to existing plans.</p>	<p>Develop and deliver recovery exercises and planning workshops.</p> <p>Support to align response and recovery governance structures, in line with QDMA.</p>	<p>Provide independent support to ensuring systems are capturing relevant data to support funding submissions.</p>	<p>Assist with strategies and policy development to enhance the transition from government supports to recovery management and business-as-usual.</p>
Planning	<p>Develop risk and hazard management strategies including assessment, gap analysis and compliance.</p>	<p>Develop local disaster management plans and procedures, ensuring compliance and readiness.</p> <p>Complete DRFA readiness assessments, including financial and resource management systems.</p>	<p>Conduct After Action Reviews and independent live evaluations.</p> <p>Identify event impacts across economic, social, built and environmental assets to support recovery planning.</p>	<p>Ensure best practice administration of public funds for community recovery and resilience projects, from application to acquittals.</p> <p>Develop event-specific recovery plans, including cost estimates and scheduling, in conjunction with state and federal governments, and non-government stakeholders.</p>
Managing	<p>Provide planning and project management support to the delivery of risk reduction and mitigation projects.</p>	<p>Conduct organisational preparedness planning to support business continuity during disaster events.</p> <p>Develop strategies for staff to acquire skills and qualifications in disaster management.</p>	<p>Develop lessons implementation project plans from reviews and evaluations.</p> <p>Support the transition from response and early relief stages to recovery.</p>	<p>Manage disaster reconstruction programs, including both technical advice and support for reporting and audit requirements.</p> <p>Identify grants and subsidies. Strengthen funding submissions by providing links to relevant strategies.</p>
Engagement	<p>Facilitate stakeholder engagement to identify locally-led disaster risk.</p> <p>Develop community awareness and education programs.</p>	<p>Deliver organisation-wide and delivery partner stakeholder engagement to ensure governance and processes are embedded prior to events.</p> <p>Develop and deliver community planning and engagement initiatives to build community disaster resilience.</p>	<p>Undertake relevant engagement across government to ensure impact identification and needs assessment inputs are in place to support recovery planning.</p> <p>Support local recovery groups with stand-up and implementation of recovery governance.</p>	<p>Facilitate community inputs into recovery planning and projects.</p> <p>Develop and deliver recovery planning activities in partnership with all levels of government and non-government agencies.</p>
