

Interactive technology sessions at the ASA Conference

While we're running our stand at the ASA Conference in Christchurch, we'll be offering interactive sessions with people to work through specific technology problems that relate to their archives with our Founder and CEO, Piers Higgs.

If you have a specific technology problem you'd like to discuss and workshop some solutions to, or are just interested in what this involved, then email piers.higgs@gaiaresources.com.au

We'll then offer up some times to run an online session with you.
