

As mobile canners, American Canning knows how tedious and manual secondary packaging can be. The PTA Handle Applicator is an automated, off-packing solution designed to improve the process of applying PakTech® handles and minimize the number of operators needed to complete a can package.

The PTA runs downstream from a filler/seamer and is comprised of three components: a powered conveyor belt, a mounted drop box instrument, and a pneumatic packing mechanism.

As cans exit a fill machine or labeler, they accumulate onto the PTA's powered stretch of double-width conveyance and queue against a set of stop fingers. Simultaneously, a mounted drop box above the conveyor splits a stack of ready-to-pack handles, individually loading them onto a packing ramp. Once sensors verify enough cans have accumulated to meet the specified packing threshold, the stop fingers retract and push fingers engage behind the cans to drive them beneath a set of packing rollers to enforce the application of the PakTech® handle. This process repeats automatically packing approximately 120 cans per minute.

For customers looking to package multiple fill volumes and/or can styles, the PTA provides complete flexibility. Operators can quickly and easily switch between packaging 4-packs and 6-packs by swapping out the stack of handles and using the selector switch on the control panel and provided stop blocks. Packaging different diameter can bodies is also possible with the purchase of a can body diameter change kit.

BASE MACHINE: \$22,000 USD

SPEED

~120 CPM
may vary per packout

CAN BODY DIAMETER(S)

211, 204 and/or 202
standard, sleek and/or slim

FOOTPRINT

54" x 20"
deck height made to order

LEAD TIME

1 WEEK + TRANSIT
FOB Austin, TX, USA

INTEGRATED DEAD PLATES ALLOW FOR VIRTUALLY INSTANT SETUP. NO ADDITIONAL INSTALLATION OR CONVEYANCE IS REQUIRED.

PRODUCT DETAILS

Speed: ~120 cans per minute

Handles: PakTech® brand 4-pack and 6-pack

Can Body Diameter(s): 211, 204 and/or 202

Fill Volumes by Body Diameter:

211 (oz): 12, 16, 19.2

211 (ml): 330, 355, 375, 440, 473, 500

204 (oz): 8, 10, 12

202 (ml): 187, 200, 250

Operating Footprint: 55" x 20"

Deck Height: Made to order

Drop Box Capacity: ~85 handles

Accumulation: 33" (~1 case)

Power: 220-240 VAC - 5amps

Air: 1 SCFM air at 50-100 PSI

ADD-ONS

Spare Parts Kit: \$550

Stainless Casters: \$450

Integrated QC Table: \$250

CHANGE KIT

Body-Diameter Change Kit: \$3,000

SHIPPING

International Air and Sea

Freight Options : to be quoted

COMPATIBLE MACHINES

CP-4 Filler/Seamer: \$USD65,000

RIF-212 Infeed Table: \$USD20,000
