

## Flexible Cysto-Nephro Videoscope CYF-VH/VHA

- High Definition (HDTV)
- 120° Field of View
- Narrow Band Imaging (NBI): to increase detection and decrease recurrence with patients with Non-Muscle Invasive Bladder Cancer (NMIBC) based on conditional recommendation (AUA/SUO Guideline 2016)<sup>1</sup>
- EvolutionTip: re-designed to eliminate sharp edges, and allows for 150% brighter light output compared to the CYF-V2
- Variable Stiffness Shaft: designed to improve patient comfort and minimise damage to the scope
