

# We are changing the face of care – delivering a truly personalised care experience with the best clinical outcomes close to home

## We believe care needs to be

- focused on the individual, not just their condition
- easily available when and where it's needed most
- designed to give patients the best possible life outcomes

As a leading cancer treatment specialist, we are continuing to change how people experience cancer treatment and care.

We have **269 treatment centres** worldwide with **41 centres** across Australia, all offering high-quality, personalised oncology treatment, tailored to patient's individual needs.

## The GenesisCare difference

- patient's will receive the highest quality, evidence-based care available, delivered with the latest treatment techniques, technology, and innovations
- they can expect a care experience that is efficient, integrated and personalised around your needs and expectations
- they will be seen within five days of referral
- patient's daily visits are made easy with average wait times of no more than five minutes, on-site parking, and a personalised team
- they will feel reassured by a highly experienced chosen consultant and care team, and we support their overall health by linking with allied health professionals where required
- transparent cost of care: **80-90% of radiation therapy is covered by Medicare**, and any out-of-pocket costs discussed upfront, with flexible payment options offered where needed
