

Ensuring peace of mind through the proven track record of this classic system

REGULATED OXYGEN INGRESS

Meyer Seals® trusted long-term supplier of the original Saranex® film was and still is at the forefront of the ROPP development and growth.

The unique characteristics of the Saranex® film offers ultimate barrier protection against oxygen, water vapour, odours or numerous chemical agents. Being both flexible and pinhole-free it is perfect for guaranteeing the wine quality.

Collectively as partners, we are both fully aware of the responsibility for the protection of the wine aroma and we take our responsibility for the reputation of the vineyards seriously.

ALKOvin™ Saranex® is ideal for the closing of all wines that need a regulated oxygen ingress.

Meyer Seals® developing SEALutions in partnership with their trusted long-term supplier of the original Saranex® film

RECOGNISED QUALITY

ALKOvin™ Saranex® utilises the proven track record of Saranex®, which has enjoyed the confidence of vineyards worldwide for decades. Meyer Seals® consequently utilises the Saranex® original classic oxygen barrier film for wine with the highest recognised surface quality and performance, within the wine industry. As a result Meyer Seals® sells about 2.4 billion ALKOvin™ Saranex® liners per annum worldwide.

ALKOvin™ Saranex®

The unique characteristics of the Saranex® film offers ultimate barrier protection against oxygen, water vapour, odours or numerous chemical agents.
