

# Elevate efficiency in sparkling wine management with vintrace

## Manage sparkling production your way

Tailored to meet the unique demands of sparkling wine producers, the vintrace sparkling wine module delivers a sophisticated solution to streamline processes, enhance visibility, and elevate the overall management and costing of your sparkling wine portfolio.

### Effortless batch tracking:

Trace the journey of each sparkling wine batch from bin to bottle. Gain granular insights into production dates, disgorgement, and aging specifics for meticulous batch control.

### Adding tirage and dosage liqueurs:

Leverage work orders to accurately calculate and add yeast, nutrients, and sugar to the wine to ensure consistency and smoother workflows.

### Inventory optimization:

Maintain optimal stock levels with real-time inventory tracking across multiple locations, preventing stockouts, and minimizing excess.

### Tirage and disgorging management:

Calculate the time it will take to fill bins during tirage and group them to improve efficiency and accuracy, then expertly record and manage the disgorging process.

### Compliance tracking:

Navigate the complexities of regulatory compliance effortlessly with seamless documentation integrated into your sparkling wine workflow.

### Comprehensive costing:

Precisely track all expenses associated with producing sparkling wine, from raw materials to labor costs.

In a world where precision and efficiency are paramount, the vintrace sparkling wine module stands as a testament to innovation in wine production software that reduces manual efforts with automated workflows.

*"Keeping track of inventory can be difficult, especially while working with traditional method sparkling programs as there are so many moving parts. The vintrace sparkling module makes it much easier with its intuitive interface and responsive support team. From tirage to riddling through disgorging, it is extremely user-friendly. I specifically find the ability to export reports to Excel very useful for tracking efficiency and monitoring loss."*

*- Clayton Anderson  
Bottling Line Manager, Argyle Wine*
