

Filling and Packing- Vinpac

At Vinpac, our Filling and Packing service ensures your wines are bottled with precision and care. We operate multiple bottling lines across two sites, accommodating a wide range of bottle formats from small to large. Each line is managed by a dedicated team, ensuring excellence from setup to the final bottle. Our facilities are certified for organic and sparkling wines, and we utilise advanced technology to enhance efficiency and sustainability.

By choosing Vinpac, you benefit from our commitment to quality, timely production, and a seamless bottling experience that elevates your brand.

- **Comprehensive Capabilities**
Our bottling lines accommodate a wide range of bottle formats, including small formats (187ml, 375ml, 500ml, 750ml) and large formats (1.5lt to 3lt). This versatility ensures we can meet all your bottling needs.
- **Sparkling and Non-Alc**
Our Angaston facility offers specialised capabilities for sparkling wines and non-alcoholic/low-alcohol wines, providing comprehensive solutions for diverse product ranges.
- **State-of-the-Art Technology**
Our recent upgrade to a state-of-the-art bottling line at Angaston includes a 50% increased capacity and steam generation for efficient water and power use, enhancing our environmental impact.
- **High-Speed Efficiency**
With Line 8 capable of bottling up to 18,000 bottles per hour, our high-speed lines ensure efficient and timely production, minimising downtime and maximising output.

- **Certified Processes**
Our sites are certified for wine handling and bottling of organic and sparkling wines, ensuring that your products meet the highest standards of quality and compliance.
- **Dedicated Teams**
Each bottling line has a dedicated team that delivers excellence and care from setup to the final bottle. Our passionate and experienced operations team is with you every step of the way.
- **Sustainable Practices**
In conjunction with our investments in solar and wastewater treatment, our bottling processes are designed to minimise environmental impact, supporting your sustainability goals.
