THE EVOLUTION OF PET+

even more greener, even more sustainable

The new PET+ is made with **35% post-consumer recycled material** (PCR), supporting the circular economy concept.

Domestic plastic waste, like water and beverage bottles, become new resources by reducing the amount of plastic going to landfills.

By choosing PET+ capsules you can reduce the greenhouse gases emitted into the atmosphere and the amount of water required for the production.

Material recommended for:

Still wine

Olive oil & vinegar

Beer & Cider

Water & Spirits

100.000 capsules*

= 3.200 recycled bottles**

^{*31}x60mm capsules with Aluminum top disc

^{**}Water bottles made of PET with an average weight of 9gr
