TRANSPORT GUIDE

Note: Top loading is only applicable to empty bins due to total load weight restrictions

Gorilla Grape Bins are so industry-centric that they deliver on all key commercial drivers.

Designed specifically for agriculture and viticulture purposes, our grape bins previously bore the acclaimed Falland name.

TIPPING METHODS

Grape Bins are able to be emptied using two methods:

- Emptying lift attachment rotating fork
- Tipping by using an overhead crane and dee lifting ring

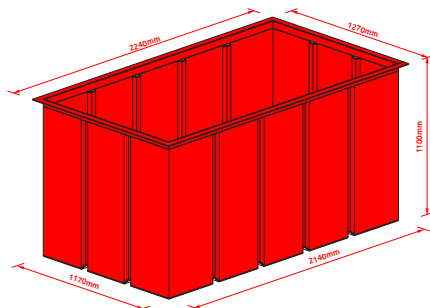

Rotating above crush

Tipping from the truck into crush with optional dee lifter

LINERS & COLOURS

- Made to suit standard steel frames
- Custom logo plates available
- Food grade polyethylene
