

“The Scout” Flowmeter Package

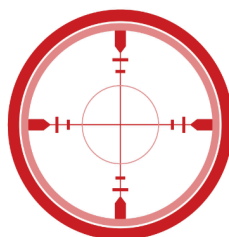

The Scout flowmeter package is designed to not only measure your product flow, but also to sound an alarm at a volume of your choosing. This allows you to perform other tasks instead of watching your transfer.

The standard package is equipped with:

- Endress + Hauser Picomag magnetic flowmeter (with SmartBlue app connectivity)
- LED totaliser with programmable audible alarm
- Totaliser reset button and switch for audible alarm
- Stainless steel trolley with 2 wheels
- 10m supply cable, storage bracket and plug
- BSM fittings

Options:

- LED light for alarm
- Powerpoint for batch control (Single or three phase)
- Automatic valve for batch control (Pneumatic or electric)
