

GoTank[®]

Understand your tank levels from anywhere

If you depend on reticulated water systems in your livestock operations, you need to know there's water in your tanks, and now that critical information is at your fingertips. No longer do you need to manually check, with our GoTank device, you can simply check our easy-to-use app and get real-time updates on all your tank levels.

This device also comes with a handy alert system that can notify you when the water level crosses your pre-defined threshold. Gain a comprehensive perspective on your water volume and usage with both current data and historical trends at your disposal, allowing you to track current water movements and changes over time. The straightforward installation and maintenance of this device ensure a hassle-free experience.

Key benefits

Accurate measurement

You will know exactly how much water you have in your tanks instantly.

Data dashboard

All your data is quickly accessible and securely stored in our easy-to-use App.

Reduce costs

Eliminate the need to manually check your tanks, and always have a record in hand of how much water you have.

Improved tracking

You can access current and historic volume and usage to understand current movements and changes over time.

Easy install and maintenance

This device is simple to install and even easier to maintain.

Affordable planning

The time saving benefits of this device outweigh the minimal investment.

Specifications

Level range

0 – 6 metres

Operating temperature range

-20 to +70 degrees

Accuracy

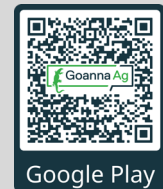

0.25%

IP rating

IP66

**Can also monitor
liquid fertiliser/FlexiN**
