

GoWISD®

Take the guess work out of assessing smoke taint in wine grapes...

GoWISD is a real-time smoke taint detection system in your vineyard that provides timely and accurate information to assist confident decision making in the aftermath of any smoke event.

Traditional methods of laboratory grape testing are difficult to access quickly during fire events, are often difficult to interpret and can be inconclusive.

An industry changing innovation, the GoWISD solution is the result of a decade long collaborative research project between Latrobe University and Wine Australia.

Using a simple to read real-time dashboard on your Laptop, PC or device, the GoWISD solution can be relied upon to underpin confidence for all stakeholders in your wine grapes.

Build to withstand tough climatic conditions, the GoWISD connects via mains power and Wifi when those services are easily accessible, or via Solar recharge and CatM1 (4G) for those more remote corners of your vineyard.

Protect the value of your wine grapes with this easy-to-use and cost-effective risk management tool.

Key benefits

Accurate measurement

Accurately and reliably measure smoke taint, temperature and humidity all with one device, with the added benefit of GPS positioning for proof of accuracy and location

Data dashboard

Accurate wine grape smoke taint risk at your finger-tips

Quality device

This device has been built to withstand harsh elements with robust componentry.

Easy install and maintenance

This device is simple to install and even easier to maintain.

Specifications

Humidity Range

0-100%

Temperature Measurement

-20°C to 100°C

GPS

Latitude & Longitude

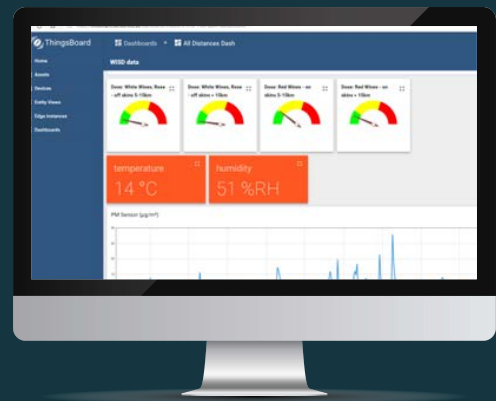

Decimal degrees accurate to 6 decimal places

Smoke Sensors

PM 1, 2.5 and PM10

IP Rating

IP66

Other products you may also like

GoTank®

Understand how much water you have available in your header tanks, comes complete with a handy alert system to notify you when the water level crosses your pre-defined threshold.

GoStorage®

Clearly see what water is being used, pumped and evaporated as well as what is in storages and channels to greatly improve your water use efficiency.

GoWeather®

Store all your weather data in our easy-to-use app, this device measures temperature, humidity, wind speed/direction, rainfall, solar radiation, dew point, Delta T, ETO and more.

GoFuel®

Eliminate the need to manually check your storage tanks and pump sites, always have a record in hand of how much fuel you have so you can place orders with ease.

Head to our website to learn more about this product or our GoSense range or contact our team to place your order.
