

NORTHLINE

Australia's Global Logistics People

International Freight Management

Our customers operate in a global marketplace and Northline connects them to their customers and supply chain partners across the world through efficient, responsive and competitive International Freight Management services.

Our international network transports, stores, tracks and delivers freight, by road, rail, sea and air across the globe, and seamlessly connects into our domestic network, and modern operating facilities.

We operate a door-to-door import and export service, dedicated to providing customers with the quickest and most economical solutions to get their cargo where it needs to be and when it needs to be there.

Our team of experienced international freight experts, which includes our Customer Service team and in-house Licensed Customs Brokers, ensures the smooth passage of freight across jurisdictions and compliance with local regulations.

This includes:

- ▶ Australian-based customer support
- ▶ Customs clearance
- ▶ Quarantine requirements
- ▶ Duty payments
- ▶ Trade consultancy
- ▶ Customs valuation rulings
- ▶ Tariff classification advice
- ▶ Preferential tariffs

Our International Freight Management service can accommodate FCL, LCL and break-bulk freight for project logistics and over-dimensional loads.

Wherever the location, customers can track their freight every step of the way with Northline's online customer portal.

Features include:

- ▶ Efficiently track shipments and their status all in one place
- ▶ Manage orders, shipments and documents with automatic notification alerts
- ▶ Analyse and optimise your supply chain with easy-to-use reporting
