

Laboratory Services- Vinpac

At Vinpac, our Laboratory Services provide precise and reliable analysis to support your winemaking process. Our state-of-the-art, NATA-accredited laboratories at McLaren Vale and Angaston are equipped with the latest technology to meet all your analysis needs. Whether you require ongoing monitoring during winemaking or standalone services for certification requirements, our expert team delivers accurate results that adhere to the highest industry standards.

By choosing Vinpac, you benefit from our commitment to quality and excellence, ensuring that your wines consistently meet the highest standards and regulatory requirements, providing you with confidence and peace of mind.

- **Leading-Edge Facilities**
Our laboratories at McLaren Vale and Angaston are equipped with the latest technology, ensuring precise and reliable analysis for all your winemaking needs. This advanced infrastructure guarantees the highest quality results.
- **NATA-Accredited**
As a NATA-accredited facility, we adhere to the highest industry standards, ensuring that every analysis is performed accurately and reliably. This accreditation provides confidence in the quality and integrity of our services.
- **Expert Team**
Our team of experienced professionals provides expert guidance and support throughout the analysis process. Their knowledge and expertise ensure that your wines are evaluated with the utmost care and precision.
- **Comprehensive Analysis**
We offer a wide range of laboratory services to support your winemaking process, from routine monitoring to specialised testing. Our comprehensive analysis ensures that all aspects of your wine production are meticulously evaluated.

- **Reliable Results**

Our commitment to quality and excellence ensures that all laboratory analyses are performed with precision and reliability. This dedication to accuracy guarantees that your wines meet the highest standards and regulatory requirements.

- **Optional Standalone Service**

Our laboratory services are available as standalone offerings, allowing you to meet certification requirements or address specific analysis needs independently. This flexibility ensures that you receive the support you need, when you need it.
