Effervescence

CHAMPAGNE DIAMOND JEWELLERY

A celebration of champagne.

Champagne diamonds have always held a special place in our hearts. Found right here in Australian sands, they capture a range of rich and earthy hues that are beyond compare.

Cheaper than many other diamond colours, they are the perfect way to go big without breaking the bank. When combined with warm yellow gold, champagne diamonds exude elegance, individuality and charm.

Whether set in colourful clusters or high-impact dress rings, champagne is the only way to celebrate!

The making of Effervescence

Natural coloured diamonds

The jewellery in this collection has been created from all-natural, ethically-sourced diamonds.

Premium metals

Whether crafted from sterling silver, 9 or 18 karat gold, only the finest metals have been used to produce each ring, earring, necklace and bracelet.

Each piece is available in your choice of metal; white, yellow or rose gold in 9 or 18 karat, and sterling silver. Please advise us of any customisations required when you place your order.

Made by master jewellers

Designed in Australia and produced by our Australian-trained jewellers, these pieces are made to the highest modern standards and exacting levels of quality control by our Western Australian-based master jewellers.

This page: Ombre & Cherish earrings. Opposite page: Ochre & Delta rings.

Rings

Make way for showstopping sparkle on a large scale - champagne diamond rings are made to turn heads!
