

Warehousing, Distribution & Export- Vinpac

At Vinpac, Warehousing, Distribution, and Export Services involve the storage, handling, and transportation of goods to ensure they reach their final destination efficiently and safely. These services include inventory management, order fulfillment, packaging, and shipping coordination. Vinpac's experienced team offers advice on packing containers, manages short and long-term storage, and handles export documentation.

With over 40,000 m² of climate-controlled warehousing space, advanced logistics processes, AGVs for efficient stock movement and a comprehensive warehouse management system, Vinpac ensures precise inventory tracking and timely delivery to domestic and global markets. Extensive Warehouse Space

- **Extensive Warehouse Space**
With over 40,000 m² of warehouse space, we provide ample storage for both finished and dry goods. This extensive capacity ensures we can accommodate all your storage needs, whether short-term or long-term.
- **Flexible Storage Services**
We offer flexible warehousing solutions to fit your needs, whether you require short-term storage or long-term warehousing. Our competitive rates and comprehensive services ensure that you receive the best value for your investment.
- **Advanced Warehouse Management System**
Our Advanced Warehouse Management System ensures accurate stocktaking and efficient management of your inventory. This system provides real-time visibility and control over your stock, enhancing accuracy and reliability.

- **Post-Production Support**

Our services continue to support you post-bottling, providing convenience and reliability in warehousing and logistics. This ongoing support ensures that your products are handled with care and reach their destination efficiently.

- **Export Services**

We offer a full range of export services, including container packing, supplying pallets, shrink wrap, slip sheets, airbags, and liners. Our team provides expert advice on packing containers and the best pallet configuration to optimise space and ensure safe transport.
