Close to you Open to the future

**AT CREALIS, WE
BELIEVE CLOSURES
OPEN UP NEW
OPPORTUNITIES**

About CREALIS

CREALIS is the leader in closure solutions for still and sparkling wines, spirits, beers, olive oil and vinegar.

We are a global player providing tailor-made solutions and assisting our clients from start to finish. Capsules and closures are designed sustainably to add value to bottles and to ultimately delight consumers worldwide. CREALIS is the alliance of expert brands bringing their unique expertise in capping and over-capping products.

Close to you

As an international leader with the largest portfolio, we have global capabilities deployed at a local level with a deep understanding of local markets.

As partner, we rely on co-creation and collaboration in every step of the process to develop tailor-made solutions designed to amaze consumers.

As a game-changer in the industry, we strive to deliver innovation and sustainability to our customers.

Respectful of the environment

We feel a responsibility to create cutting-edge closures, capsules, wirehoods, corks and bartops that are respectful towards our planet.

To us, sustainability is the only way forward, leading our innovation process and driving our community of talents to be more effective, while focused on reducing, reusing & recycling.

Open to the future

Inspired by innovation, we design the next generation of bottle closures with a passion for creativity.

We believe in a world where every detail matters.

A world where sustainability meets efficiency and innovation and design drive preference. This is our commitment to our customers and the planet.

CORCHOMEX

THE 5 ESSENTIAL ASSETS OF THE CAPSULE AND THE SPARKLING FOIL

According to a qualitative study conducted in October 2022 by SOWINE, in collaboration with the "Ecole Supérieure des Agricultures d'Angers", consumers perceive 5 major assets:

Hygiene: the capsule protects against dust and possible contaminations. Ensuring the integrity of the bottle is an aspect that is even more important in a distressing bacteriological context.

Guarantee/Security: the capsule guarantees the authenticity of the product, acting as an anti-counterfeiting system, making any attempts of tampering obvious.

Valorization: the capsule represents a way to increase the perceived value of the product, becoming a sales tool associated with the label.

Recognizability on the shelf: the capsule orients the consumer, simplifies and accelerates the purchasing process.

Opening ritual: Intergenerational tradition and history. The pleasure of opening a capsule is inherent to the moment of conviviality.

Find the testimonials of our customers and consumers on their perceptions of the capsule by scanning this QR code

ATELIER CREATION

Design and inspiration for your closure solutions

Our Design Studios create unique capping and over-capping products for our customers' brands with passion, creativity and expertise. Seducing and conquering through beautiful packaging and storytelling is one of Crealis' primary missions.

Luxury SPARLUX FOIL

High-end sparkling foils

Sparlux sparkling foils are uniquely crafted without top creases, thanks to moulded aluminum. They offer extensive personalization options and various thicknesses, embodying the essence of luxury while seamlessly integrating sustainability through the Absolute Green Line (AGL) technology. This innovative technology uses biobased polyethylene derived from renewable biological raw materials*, reducing reliance on limited fossil fuels, lowering carbon emissions, and promoting sustainable resource use.

* ISCC+ certified bio attributed PE (BA), based on the Mass Balance approach.

Performance:

- ✓ Moulded aluminum, flat or round top
- ✓ Various thicknesses to accentuate the perception of quality
- ✓ Easy to open sommelier tear tab and perforations available

Design:

- ✓ Numerous personalization possibilities, using digital, hot stamping or rotogravure impression
- ✓ Impressive embossing options on top and/or skirt to include blind embossing, ink embossing, and curved hot stamping. Art & Craft embossing on top available
- ✓ Wide range of medallions and pebbings
- ✓ Peel to reveal printing

Sustainability:

- ✓ Bio-sourced polyethylene
- ✓ Renewable biological raw material
- ✓ ISCC+ certified
- ✓ European manufacturing

Prestigious **ART & CRAFT WIREHOOD**

**The most delicate and
sophisticated wirehood on the
market**

Art & Craft wirehoods are fully customizable products in terms of dimensions and designs. Created to offer the deepest and richest brand engravings, these exclusive wirehoods are perfect for a premium cuvée, a limited edition, or special bottle sizes.

Performance:

- ✓ Unique 3D engraving technology
- ✓ Ultra-premium look & feel
- ✓ 100% customizable
- ✓ EPV Label meaning “Entreprise du Patrimoine Vivant” a living heritage business

Sophisticated TINCLASS CAPSULE

When purity and elegance walk hand in hand

Developed from ingots of the highest purity, tin capsules created in a single piece are synonymous with attention to detail and the search for perfection.

A sign of distinction that represents the continuation of the faithful and honest work of the most prestigious winemakers and liquor manufacturers: elaboration, patience, tradition and quality.

Performance:

- ✓ Authenticity, elegance and exclusiveness
- ✓ Artisanal and customized pieces of art
- ✓ One single piece capsule, without seams

Design:

- ✓ "Tempo" option, with an unique craft effect
- ✓ Impressive definition of reliefs and reach decorations

Sustainability :

- ✓ Water-based inks
- ✓ 100% recyclable

Solution recommended for the following markets:

Still wines

Discover COLLECTION

Perfect balance between smart design and reliable technology for packaging.

From secondary to primary closures, the collection includes:

- PREMIUM sparkling foils
- WIREHOODS
- CAPSULES:
 - Alu-One single piece capsule in pure aluminum
 - Elite capsule in poly laminate material
 - Termo capsule in pvc and PET+
- CLOSURES:
 - Screw cap 30x60 and Screw Bartop
 - T-Bar
 - T-Scent
 - T-Pourer
 - Crown cap and Bidule
 - Pedistrip®
 - Technical and Nature® cork

Whatever your needs, you can expand towards new opportunities.

Quality PREMIUM SPARKLING FOIL

Quality product providing affordable personalization

With many decorative details, standard or customized colored premium sparkling foils offer a possibility to enhance the value of your product. Available in every possible format and light-weight thicknesses.

Performance:

- ✓ Folded top with pasted top disc
- ✓ Focus on light-weight thicknesses

Design:

- ✓ Standard and custom colors
- ✓ Several personalization possibilities
- ✓ Rotogravure and hot stamping techniques

Sustainability:

- ✓ Symbiosis®: made of Paper and Aluminum (plastic-free)
- ✓ R-derma®: made of 60% of recycled polyethylene

Single piece **ALU-ONE** CAPSULE

The elegant and light alternative

Aluminum capsules seamless with the same decorative process as Tinclass capsules (base spray and silkscreen decoration).

This premium product offers a refined result and incorporates highly recyclable material. In addition to its elegance and lightness, the Alu-One capsules have an excellent resistance to corrosion.

Performance:

- ✓ One single piece capsule, without seam
- ✓ Light and elegant

Design:

- ✓ Great color richness and intensity
- ✓ Impressive decoration finishes

Sustainability:

- ✓ 100% recyclable
- ✓ Water-based inks

The ELITE CAPSULE

An alliance of character

Elite poly laminated capsules are made in two pieces and offer many decorative and innovative possibilities.

They are fully customizable and allow for an easy application on any type of bottle.

With unlimited colors, shades and many finishing possibilities, the Elite capsules bring character to your bottle.

Performance:

- ✓ Made in two pieces
- ✓ Adaptable to any type of bottle

Design:

- ✓ 100% customizable
- ✓ Multiple decorative possibilities
- ✓ Rotogravure and hot stamping techniques

Sustainability:

- ✓ R-derma®: made of 60% of recycled polyethylene
- ✓ Absolute Green Line®: bio-based polyethylene

Recommended for the following markets:

Still wines

Spirits

Olive Oil & Vinegar

Complementary products

- ✓ T-Bar closure
- ✓ Technical and Nature® cork

Flexible TERMO CAPSULE

Flexible solution to fit any shape of bottle and closure

Heat shrinking capsules made in premium quality PVC or PET+ able to follow any shape of cork and bottle neck thanks to their great flexibility and easy application. Convenient solution available in different colors and sizes.

PET+

Eco-friendly and superior sustainable heat shrinking capsules made to respect the environment, by sealing and decorating the bottles. The expertise developed in the technology makes these capsules a green solution reducing the impact on the environment.

Performance:

- ✓ Flexible
- ✓ Suitable for any bottle neck

Design:

- ✓ Rotogravure and hot stamping decorations available

Sustainability:

- ✓ Eco-friendly and sustainable material made with PCR (Post Consumer Recycled) waste
- ✓ Chlorine free

Recommended for the following markets:

Still wines

Spirits

Olive Oil & Vinegar

PVC

Quality and convenient heat shrinking capsules made to protect the cork, seal the closure and bolster the brand image.

Fully customizable in colors and decorations or completely clear, PVC Thermo capsules seal and finish the bottle.

Performance:

- ✓ Flexible and convenient
- ✓ Easy to apply
- ✓ Suitable for any bottle neck

Design:

- ✓ Standard or customized colors available
- ✓ Rotogravure and hot stamping decorations available

Complementary products

- ✓ Screw cap and Screw top
- ✓ T-Bar closure
- ✓ Technical and Nature® cork

SCREW CAP *30x60*

The guarantee of consistency with a custom touch

Unparalleled aluminum screw caps for wines ensure the quality, safety and freshness of each bottle.

Designed for BVS bottles, the screw cap collection is a high-level closure preserving all the flavors of the wine thanks to the various liners available. Fully customizable with several decorative capabilities, screw caps are easy to use, close, reopen and store.

Performance:

- ✓ Dimensions:
30x60mm
- ✓ Different liners
available, based on
the type of the wine

Design:

- ✓ Standard and custom
colours available
- ✓ Fully customizable

Sustainability:

- ✓ 100% recyclable

SCREW BARTOP

Easy, efficient and versatile

Dynamic solution ensuring quality and reliability. Available in different materials, colors and customizations, to meet any need.

Main characteristics:

- ✓ Easy and versatile
- ✓ Simple but unmistakable

Supercap expertise

Discover GREEN TECH

By developing sustainable & innovative materials, Crealis is a front-runner in the production of tailor-made sustainable capsule & closure solutions for any bottle around the world.

Three different pillars are the key elements distinguishing the Green Tech Portfolio: the **Circularity** in which the use of recycled materials within our products reduces waste sent to landfills; the use of **Alternative materials** instead of traditional ones like fossil-based and conventional resources; the use of **Compostable Materials** that can be turned into natural resources such as industrial compost.

CIRCULARITY:

- R-derma®
- PET+

ALTERNATIVE MATERIALS:

- Symbiosis®
- Absolute Green Line®
- E|C|O® LINE
- T-Monobloc Cork
- Bio-Bidule

COMPOSTABLE:

- T-Kompost

Circular R-DERMA®

R-derma® is a new generation of sustainable foils and capsules with 60% recycled polyethylene.

R-derma® moves towards a low environmental impact and provides a second life for waste.

Sustainability:

✓ **21% carbon footprint reduction*** comparing a sparkling foil made with Derma75 and the new R-derma® L. R-derma® is a sustainable poly laminate combining the benefits of the glueless poly lam Derma with the recycled content used for the polyethylene (PE), the internal layer of the material. In addition, the sparkling foil version (named R-derma®L) is made with a new aluminum alloy that allows the advantage of being more sustainable, ensuring strength, quality and reliability.

Available for

- ✓ Premium sparkling foil (R-derma® L)
- ✓ Elite capsule

**Independent Life Cycle Assessment (cradle to gate - data collection year 2023 - production at Crealis S.p.A. Bodio Lomnago, Italy) with the methodological support in the calculation by Deloitte in 2024, comparing Derma75 Premium foil with R-derma® L Premium Foil using a standard size Premium sparkling foil diameter 34mm, taper 1/8 and length of 120mm.*

Recommended for the following markets:

Sparkling wines

Still wines

Beers & Ciders

Spirits

Water & Beverage

Available only in some countries

Circular PET+

The unique and sustainable material for shrinking capsules

Made with 35% recycled and post-consumer waste, PET+ offers premium customizations and high-quality performance. Know-how, expertise and a strong commitment to the environment make PET+ the solution for sustainable shrinking capsules.

Performance:

- ✓ Several sizes and dimensions available to fit any closure and bottle

Design:

- ✓ Personalization options available: rotogravure printing and hot-stamping

Sustainability:

- ✓ Focus on circular economy, giving waste a second life
- ✓ -12%* carbon footprint reduction versus our Termo PVC capsule
- ✓ Chlorine free

Available for

- ✓ Termo capsule

**Independent Life Cycle Assessment (cradle to gate - data collection year 2023 - production at Crealis S.p.A. Bodio Lomnago, Italy) with the methodological support in the calculation by Deloitte in 2024, comparing PET+ 35% recycled content (with Aluminum top) with our Termo PVC capsule using a standard size Termo capsule diameter 29.25mm, taper 50° and length 55mm*

Recommended for the following markets:

Spirits

Olive Oil & Vinegar

Still wines

Beers & Ciders

Water & Beverage

Available only in some countries

Paper based SYMBIOSIS®

Designed for a green tomorrow.

By revisiting one of the most traditional and sustainable materials – **Paper** – and combining it with the durable **Aluminum**, Symbiosis® sets a new standard in sustainable packaging.

Completely plastic-free and made predominantly of paper, Symbiosis® is the new concept for sparkling wine packaging, designed to reduce CO₂ emissions.

** Independent Life Cycle Assessment (cradle to gate – data collection year 2023 – production at Crealis S.p.A. Bodio Lomnago, Italy) with methodological support from Deloitte in 2024. This assessment compares Derma75 Premium foil with Symbiosis® foil with paper top, using a standard size Premium sparkling foil (diameter 34mm, taper 1/8, length 120mm). When comparing Symbiosis® foil with Derma75 L, the reduction is -15%, as the latter material (Derma75 L) already benefits from a CO₂ reduction. The focus is on the Global Warming Potential (GWP), specifically analyzing Greenhouse Gas (GHG) emissions through the IPCC 2021 GWP100 model, which includes CO₂ uptake.*

Design:

- ✓ Customizable in sizes
- ✓ Colors (by rotogravure, digital and hot stamping)
- ✓ Several accessories (medallions, teartab, holes, etc..)

Sustainability:

- ✓ 100% Plastic-free
- ✓ Disposable in the paper bin after use
- ✓ 30% Carbon footprint reduction (*)

Available for

- ✓ Premium sparkling foil

 Crealis

Bio-Based ABSOLUTE GREEN LINE®

Introducing Absolute Green Line: sustainable polyam foils and capsules, produced with bio-sourced polyethylene*.

The Absolute Green Line embodies our dedication to sustainability. This innovative material retains the high technical properties, offering optimum strength and flexibility of traditional polyethylene, while being more sustainable. In this way, using bio-sourced polyethylene reduces our dependence on limited fossil fuels, lowers carbon emissions and promotes sustainable resource use.

** ISCC+ certified bio circular attributed PE (BCA), based on the Mass Balance approach.*

*** ISCC+ certification (International Sustainability and Carbon Certification Plus) is a global standard designed to guarantee the sustainability and traceability of raw materials in supply chains, including environmental, social and economic criteria.*

Design:

- ✓ Numerous personalization possibilities
- ✓ Rotogravure and hot stamping techniques

Sustainability:

- ✓ Bio-sourced polyethylene
- ✓ Renewable biological raw material

Natural T-MONOBLOC CORK

The 100% natural cork monopiece solution.

Unique, precious and sustainable, T-Monobloc Cork is entirely carved from the bark of the cork oak. A 100% natural cork monopiece, without glue. The cork harvest takes place around every nine years; the oak has a regeneration process during which it absorbs more CO₂ to regrow its lost bark, thus preserving the biodiversity of the ecosystem.

Design:

- ✓ Customizable shape
- ✓ Engraving

Sustainability:

- ✓ 100% natural cork monopiece
- ✓ Renewable raw material

Bio BIDULE

INVESTING IN A SUSTAINABLE FUTURE

Bio based products.

The Bio Bidule is an innovative technology and sustainable product that actively contributes to reducing environmental impact, thanks to the origin of the materials.

The Bio Bidule is sourced from agricultural or vegetal feedstocks—renewable biological resources* such as vegetable oils (e.g., rapeseed/canola, soybean oils).

This innovative material retains the high technical property, offering optimum strength and flexibility of traditional polyethylene, while being more sustainable. In this way, using ISCC+ certified bio-attributed polyethylene reduces our dependence on limited fossil fuels, lowers carbon emissions, and promotes sustainable resource use.

** ISCC+ certified bio attributed PE (BA), based on the Mass Balance approach.*

Performance:

- ✓ Made in virgin PVC-free polyethylene
- ✓ Different dimensions: 26mm, 29mm and 36mm
- ✓ Same shape, function and chemical composition than traditional bidule.

Sustainability:

- ✓ 100% recyclable

Recommended for the following markets:

Sparkling wines
traditional methods

Compostable T-KOMPOST

The first pourer solution with an innovative 100% compostable top*

Exceptional green innovation, transforming the upper part into compostable material, thus reducing waste.

** Industrial compostable. The top should be disposed of in wet organic waste. Do not dispose of in domestic self-composting systems and do not throw in the environment.*

Sustainability:

- ✓ 100% compostable top
- ✓ Eco-friendly solution

Recommended for the following markets:

Olive Oil & Vinegar
