have a perfect view of the hills and how the city is placed. Valparaíso perfectly combines the historic port life with the cultural life on the hills.

Valparaíso and its geography have made that its inhabitants had to construct their houses and buildings in the mounds and ravines that surround it. This vertical labyrinth makes a thousand corners and in each one we can find some interesting surprise.

For some beautiful reason, the walls, gates and even sidewalks of Valparaíso harbor a hundred fantastic graffiti, which are the delight of both passersby and amateur or professional photographers. It is said that Valparaíso is an open-air gallery, since many street artists have decided to use their walls and facades of old houses to add color to this city that already stood out for its shades.

Upon to our arrival to the city we will meet an expert in the graffiti culture who will introduce us to the main areas where these art is exposed like Cerro Concepción, Carcel and Alegre.

The most important exponents of this type of art have shaped their works to form this great outdoor gallery, adding images of local history, social messages, subliminal and graphic accounts of events that have marked the culture of the city. We will see works of different nationalities, such as Mr. Papillon, Stink Fish, Otto Shade, Dasic, Inti, UnKolorDistinto, etc. We will learn to recognize his works and different techniques, strokes and color palettes that characterize each one.

Finally we will participate in a Graffiti Workshop where we will make our own painting on a wall. We will put into practice what has been learned during the tour, developing an own creation and using the techniques observed.

After this experience we will continue our visit to the main attractions of Valparaíso and then return to the hotel in Santiago in the afternoon.
