

Innovation in Energy and Carbon measurement and reporting – IoT, Cloud services and machine learning

Lincoln Watson
ESP

Technology continues to deliver new levels of productivity in all industries. Cloud, IoT and machine learning is now an important part of the toolkit for operations, property, and sustainability managers. This presentation will update you on technology innovations for energy and carbon managers. The focus will be on the collection, enrichment, and processing of data for sustainability leaders to deliver productivity and timely reporting, and enable business planning, measurement of results and continuous performance verification.
