

LAERDAL SIMULATION EDUCATION SOLUTIONS FOR NURSING

Tomczak, L
Laerdal Pty Ltd, Australia

This educational, interactive and hands-on workshop will focus on integrating e-learning simulation into nursing curricula using vSim. With a focus on the Circle of Learning, the two-hour workshop will demonstrate the impact of incorporating this cognitive learning component by way of virtual simulation and pre-simulation quiz as preparation to ensure success in the simulation laboratory environment.

Using your own laptop PC, you can experience the vSim cases and receive the feedback a student would receive. The workshop will also focus on the instructor experience and how to see the class results in one area. Part two of the workshop will focus on treating the same patient case used in the eLearning component in an actual simulation scenario.

Duration: 2 hours
