

Cyooda Services and Solutions

From protecting sensitive matter data to uncovering critical digital evidence, we empower law firms to stay secure, resilient, and ready without compromising client trust.

Overview

Through our services and solutions, law firms benefit from robust cybersecurity foundations that safeguard their people, assets and data against cyber criminals.

Legal teams receive expert assistance in uncovering crucial evidence for civil or criminal cases.

By partnering with us, we can help you and your clients gain enhanced cybersecurity programs, improved data governance and reduced risk. This strengthens trust with your brand, expands your service offerings, and positions your firm for success.

What we can help you with

Prepare

Build resilience before crisis strikes

Proactive preparation is your strongest defence. Our services help law firms build resilience before an attack strikes through staff training, simulated breach exercises, and cybersecurity maturity assessments. Equip your firm to stay calm, capable, and compliant when it matters most.

Detect

Detect and deter evolving threats

Timely detection is critical to stopping cyber threats in their tracks. We uncover hidden vulnerabilities, simulate real-world attacks, and implement early warning systems that help you spot and neutralise threats before they escalate into breaches.

Respond

Proactive digital forensics and rapid incident response when it matters most

When a breach occurs, time is critical. Our expert-led digital forensics and incident response team helps you contain threats, investigate what happened, and meet regulatory obligations. We specialise in supporting law firms through ransomware, data loss, and targeted cyberattacks with speed, discretion, and precision.

Consulting and Advisory

Improve your security with our tactical and strategic advisory services.

An experienced cybersecurity expert available on a part-time contract basis, providing strategic operational guidance and leading efforts to strengthen defenses against cyberattacks. Flexible services are designed to minimise the impact of cyber threats to your business.
