# CATHOLIC EDUCATION

## Archdiocese of Canberra & Goulburn

4 THE CANBERRA TIMES Monday July 11, 2022

canberratimes.com.au

### NEWS

## The education revolution taking place in our schools

Catholic educators are moving towards explicit, direct instruction over inquiry-based learning - and the early results are very promising, writes SARAH LANSDOWN

Mr Fox said Catholic schools were now trying to get the right balance between inquiry and explicit instruction while achieving a consistent approach among every single classroom in the archdiocese.

"Foremost among the concerns is that the reliability of learning, the consistency of achievement across classrooms, schools, and the system was as high as possible.

"We want to see that we're meeting the needs of every student."

**The science of learning**

In Australia, 2019 national testing results revealed that over 52,000 children (17.1 per cent) left primary school with reading skills at or below the national minimum standard.

Edith Cowan University Associate Professor Lorraine Hammond developed the professional learning model for the Catalyst program.

"When children are born, they learn how to walk and talk and smile and engage in a social situation, but everything else we really have to teach them," she says.

ALFRED  
COLLEGE

# Learning intentions

1. What challenges
2. What we already know about reading
3. What is the 'right' diet for an intervention?

# Our Dyslexic Children

# Extent of illiteracy at secondary school

- About **20%** of adolescents exhibit reading that is below acceptable standards (PISA 2015 & Jerrim and Shure, 2016).
- The average Australian student in 2019 performed at a level in reading that is **12 months below** the average Australian student in 2015.

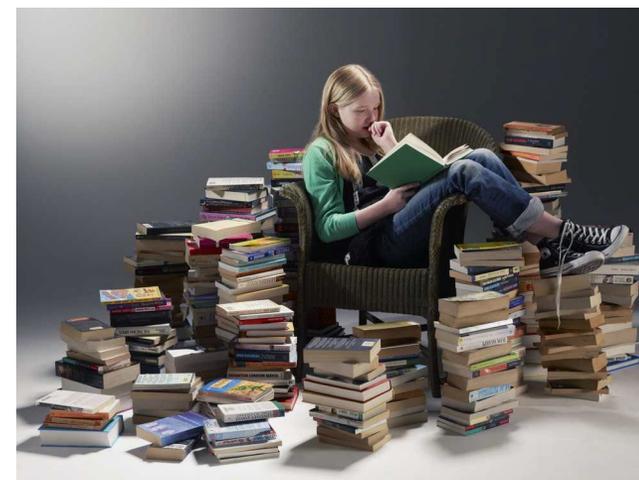

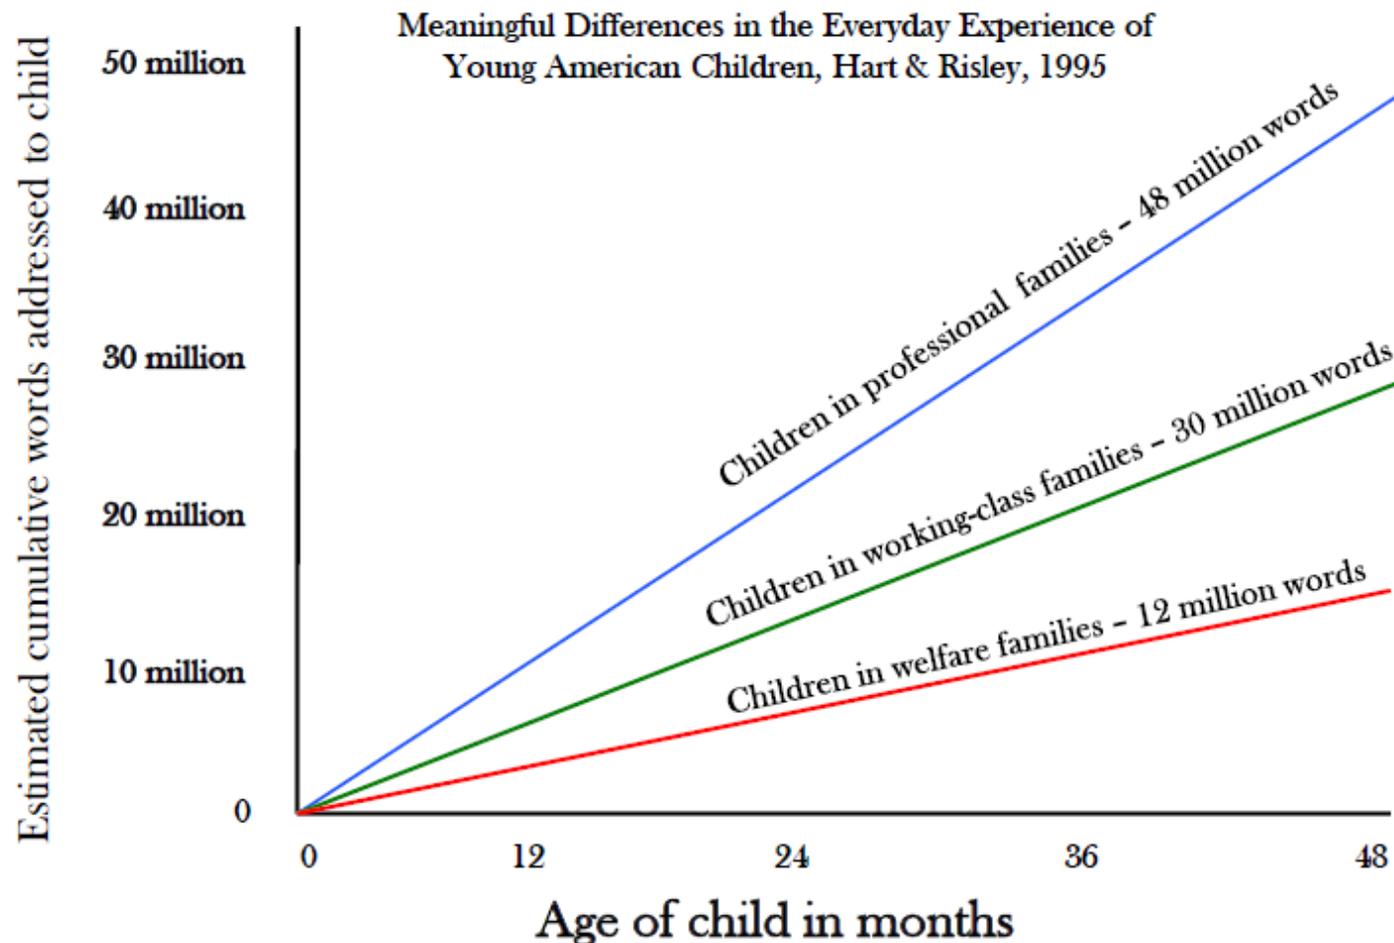

# The Matthew Effect

Gap widens as time goes on. The earlier you catch literacy difficulties, the less there is to fix.

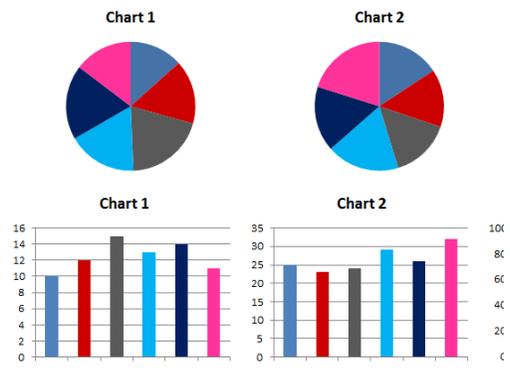

# The achievement gap begins early

Year 5 children, words per year:  
10<sup>th</sup> percentile 60,000 words / year  
90<sup>th</sup> percentile 4,000,000 + words / year

# Secondary Schools and Students at Educational Risk

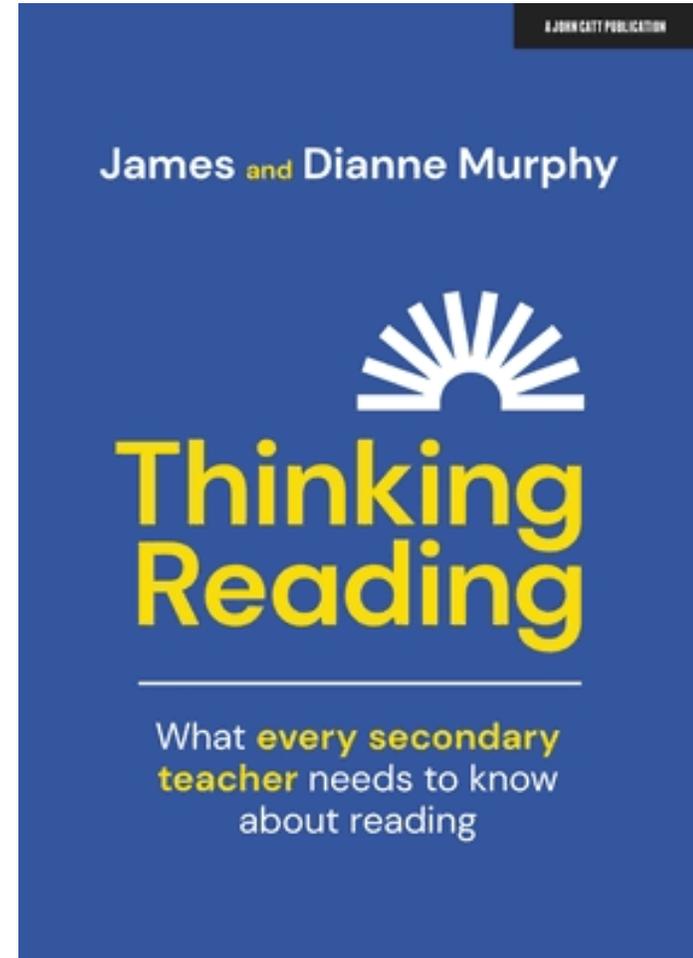

These are the most challenging students in a secondary school. They need the best teachers on the job.

Secondary teachers are trained on the basis that the students coming into secondary school have attained a Year 6 level of competence.

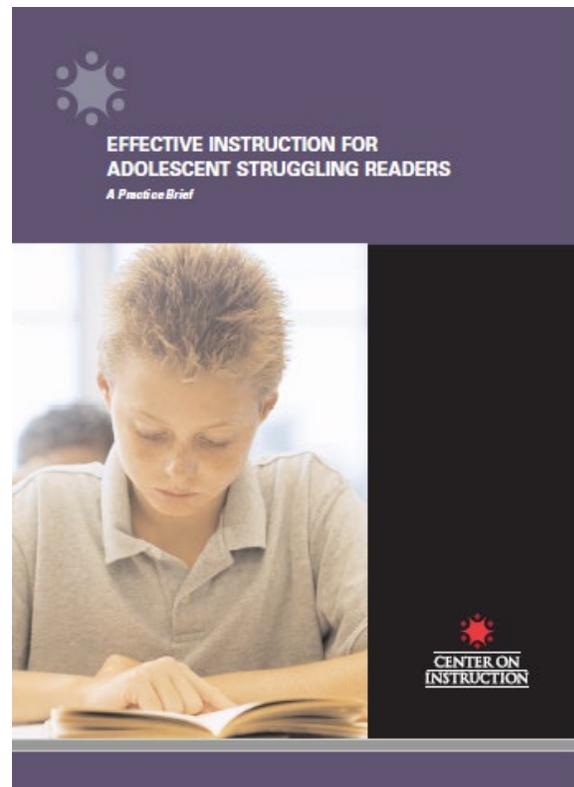

Secondary teachers are not equipped to teach reading or the basics of writing.

# Multi-Tiered System of Support (MSST)

## 1. What is Response to Intervention?

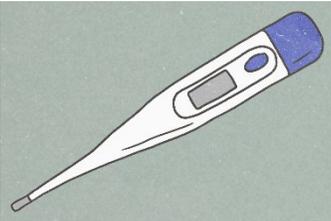

### Response to Intervention (or Rti)

is a data-driven, multi-tiered system of support that is designed to help struggling learners in general education settings.

# Assessments to guide literacy instruction and intervention

Why	What	For whom	When
	Universal literacy screener (Brief, standardized assessment)	All	1-3 times a year
	Diagnostic assessment In-depth, aligned to the Big 6	Few: those students at risk	anytime
<b>Action/intervention (MTSS) Ongoing Formative assessment</b>			
	Progress monitoring Very brief (1-3 min)	Few: those students at risk	Weekly, fortnightly
	Outcome evaluation (Mastery learning & curriculum expectations)	All	After units of study or at the end of a school year

# Assessments to guide literacy instruction and intervention

Why	What	For whom	When
Identify <b>who</b> is at risk <i>Are students at, above or below benchmark?</i>	Universal literacy screener (Brief, standardized assessment)	All	1-3 times a year
Determine <b>what</b> to teach: what skill need to be taught?	Diagnostic assessment In-depth, aligned to the Big 6	Few: those students at risk	anytime
<b>Action/intervention (MTSS)</b> Ongoing Formative assessment			
Are students benefiting? Is our instruction working?	Progress monitoring Very brief (1-3 min)	Few: those students at risk	Weekly, fortnightly
Have students learned what need them to know?	Outcome evaluation (Mastery learning & curriculum expectations)	All	After units of study or at the end of a school year

# Dynamic Indicators of Basic Early Literacy Skills

DIBELS is an assessment system for use in prevention and early intervention of reading difficulties.

The DIBELS system includes an integrated set of measures that help determine if students are learning the reading skills necessary to be successful readers.

The DIBELS system can help determine whether instruction and intervention efforts are working as intended to improve student reading outcomes.

Directly assesses the BIG IDEAS.

# Ask yourself

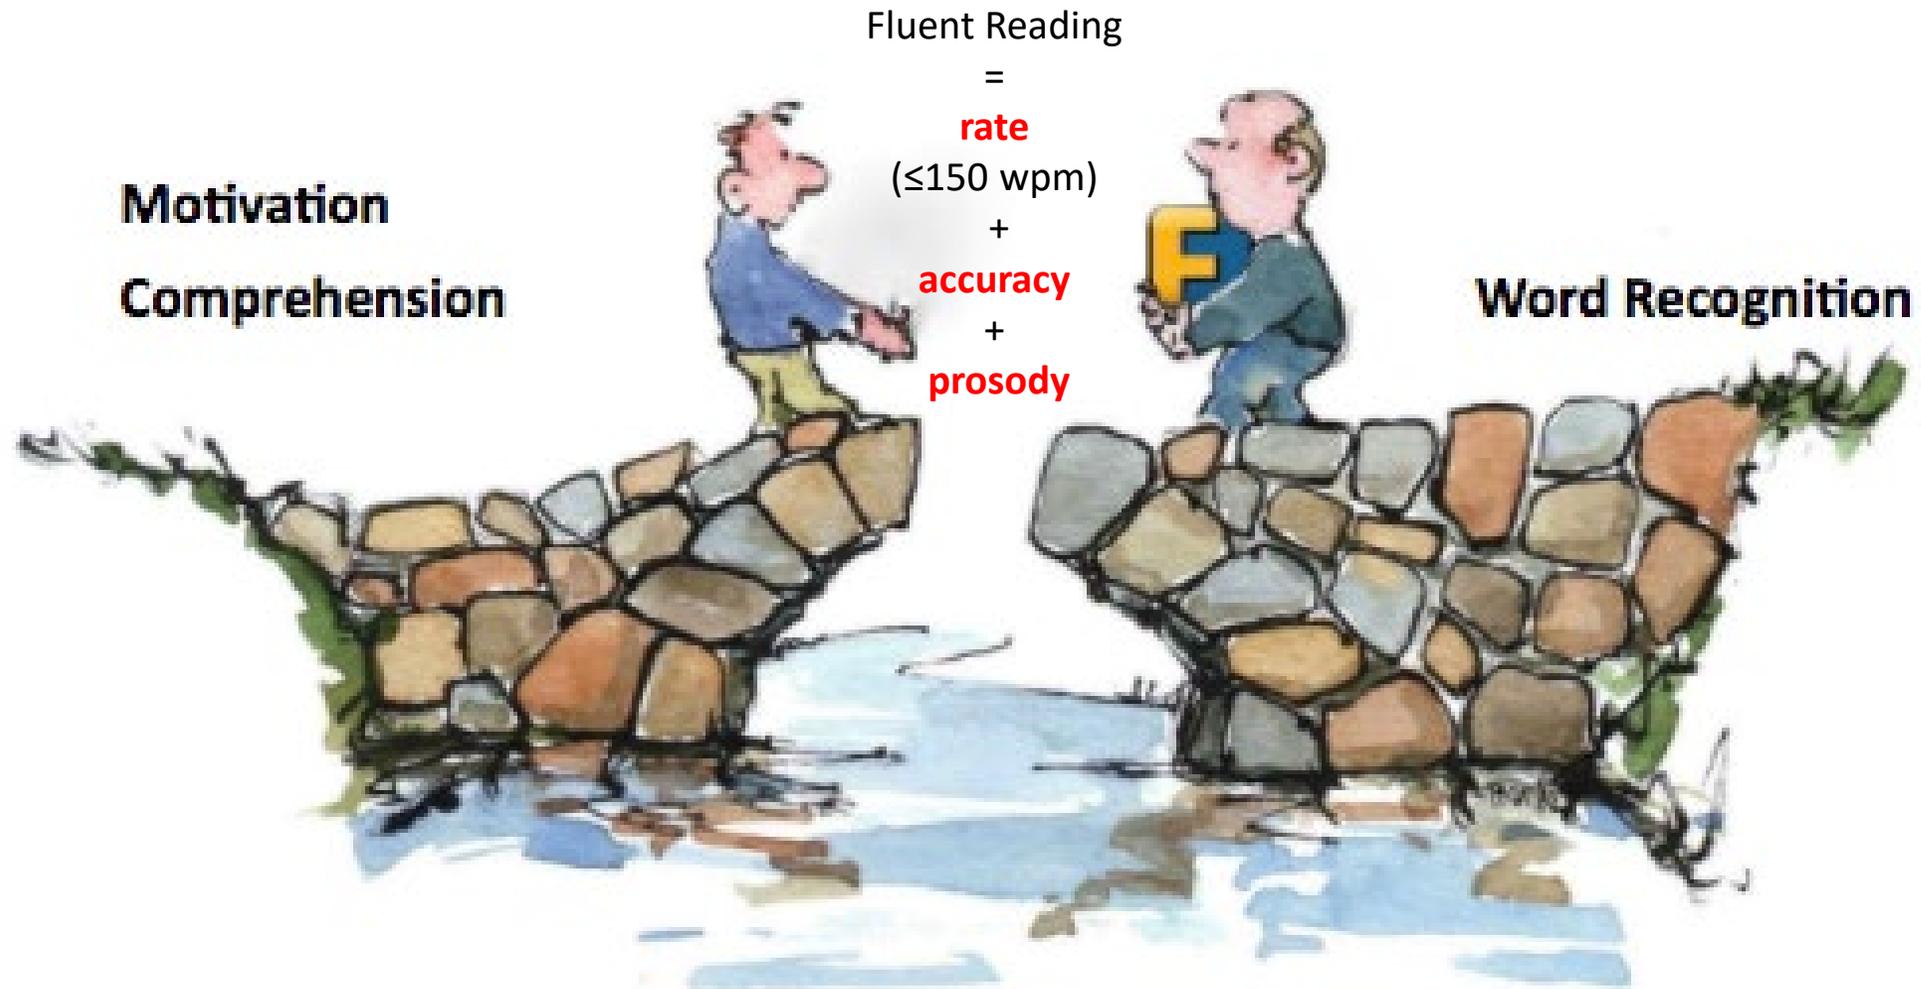

Is the student reading at year level?

When reading out loud, does the student mispronounce, substitute, skip or guess words?

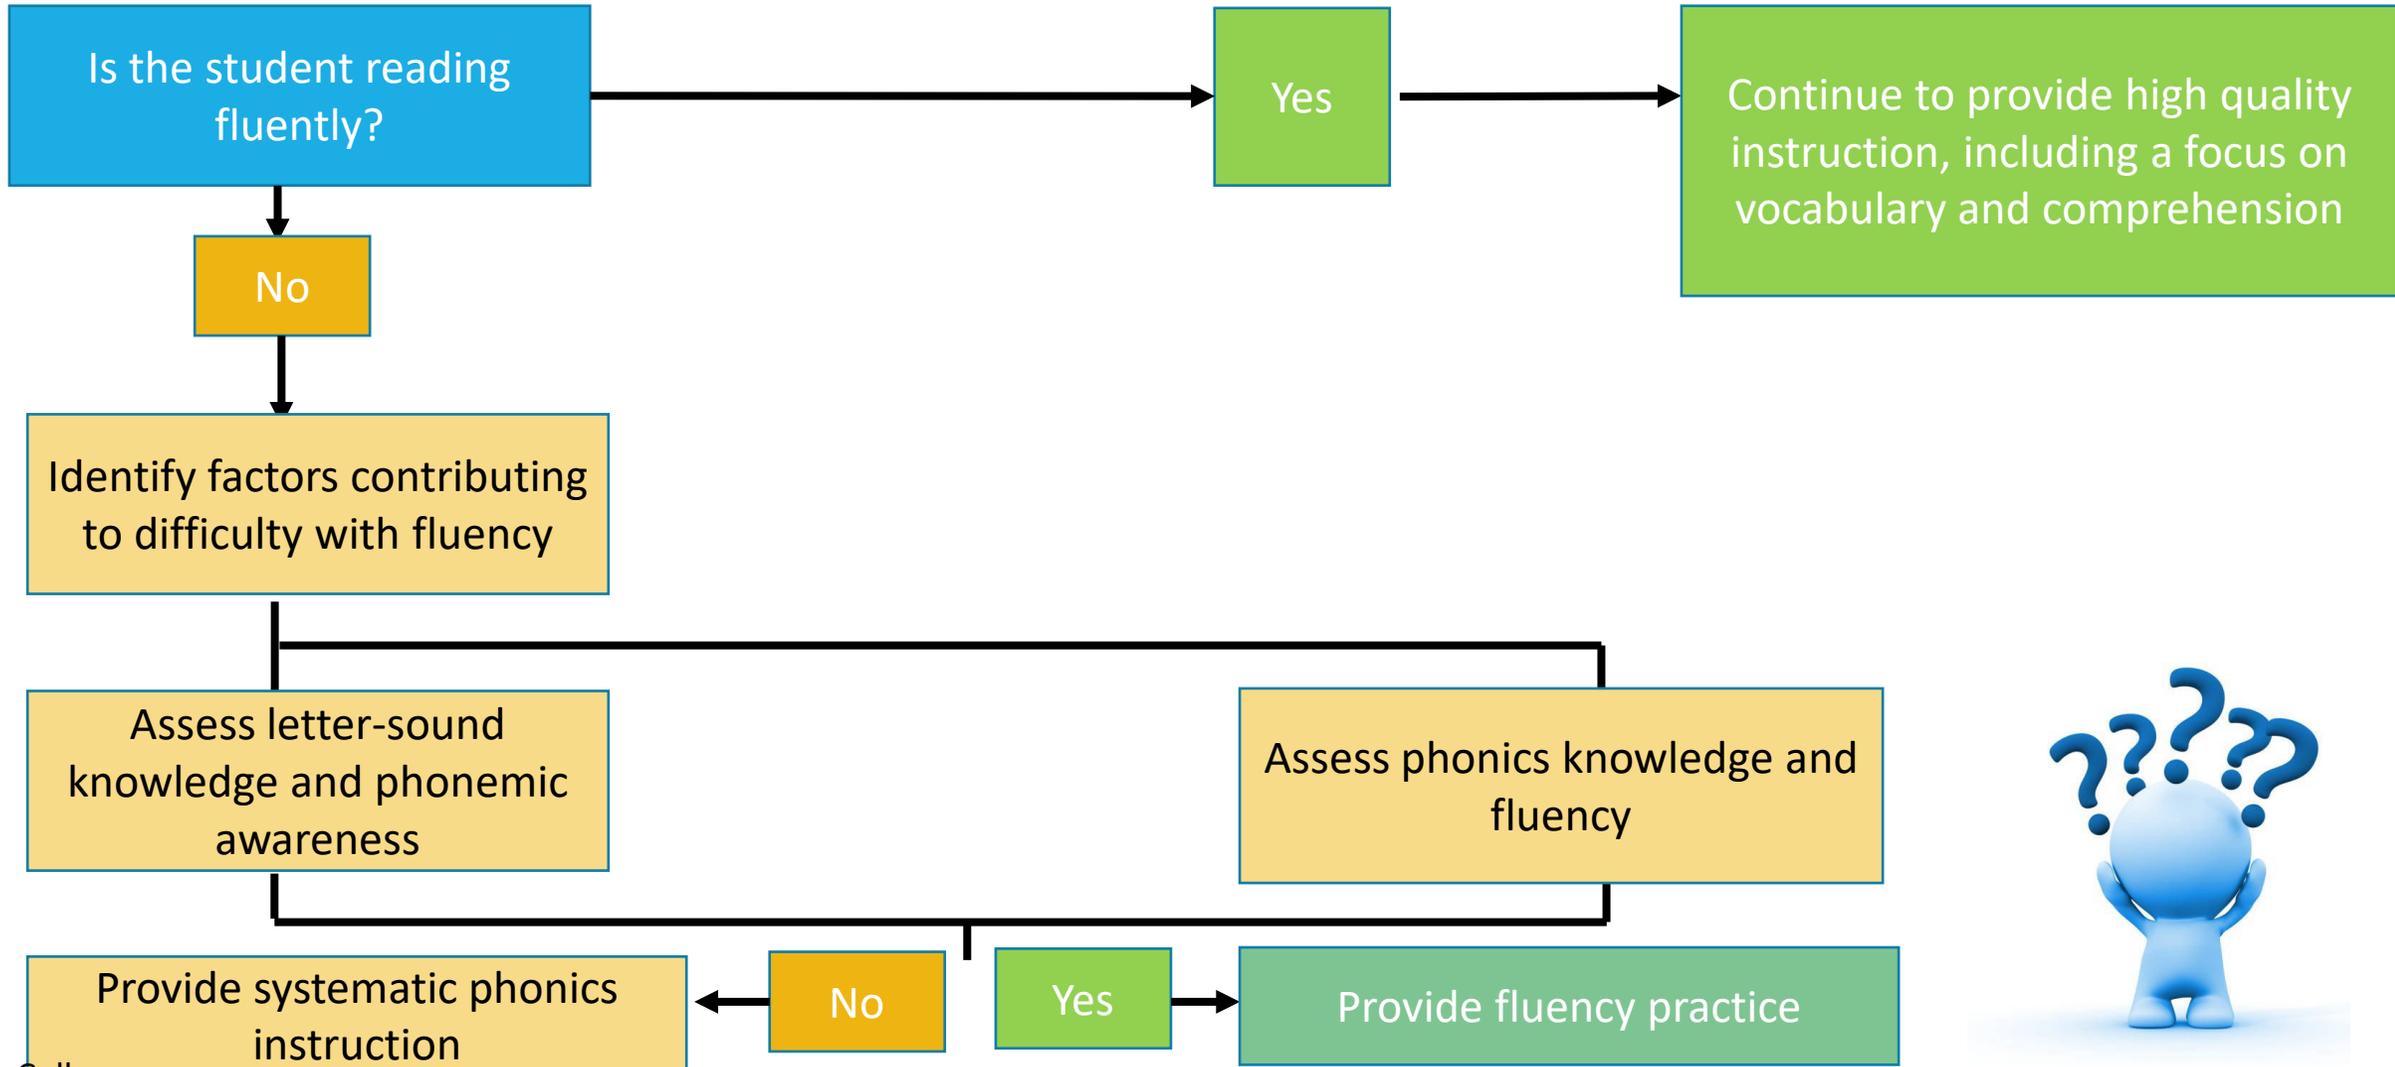

Can the student accurately answer comprehension questions about what they have just read?

# Fluency is the bridge to reading comprehension

# Fluency flow chart

# Diagnostic measures

- Phonological Awareness: Phonological Awareness Skills Test (PAST)
- Phonics and fluent word recognition:

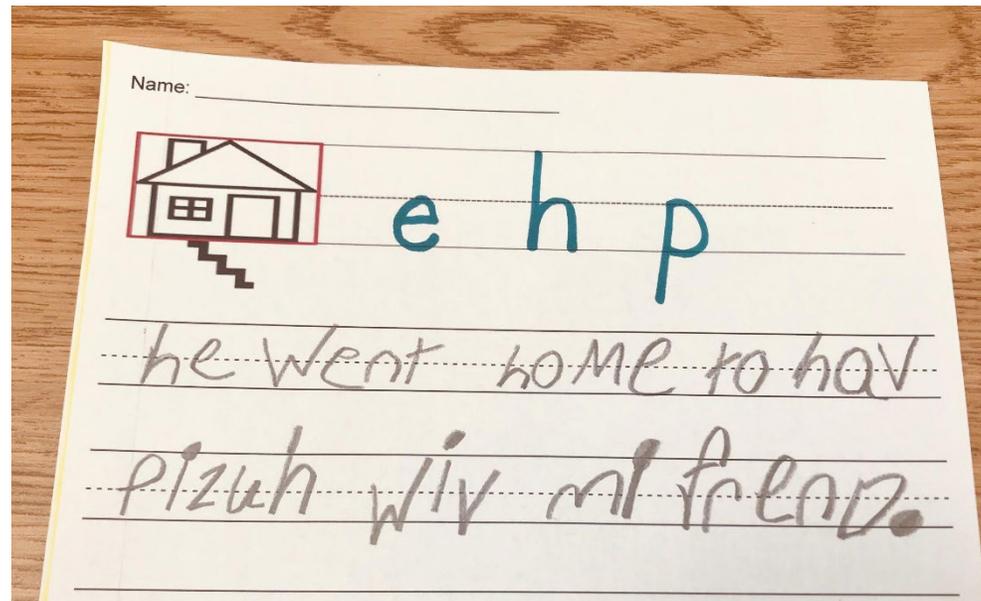

**MACQUARIE**  
University

A screenshot of the Motif website, which is a resource for diagnostic tests. The page features a grid of test cards. Each card includes a title, a brief description, and a small icon. The tests listed include: CC2 (The Castles and Coltheart 2), DiSTn (The Diagnostic Spelling Test for Nonwords), LeST (The Letter Sound Test), LetPos (The Letter Position Test), BAPPA-R (The Battery for Assessment of Plural Processing in Aphasia (Regularity)), CC2 (The Castles and Coltheart 2), DiSTi (The Diagnostic Spelling Test for Irregular Words), DIRT (The Diagnostic Reading Test for Nonwords), TOWRE Australian norms (Norms for Australian primary school children for the TOWRE), EasyRead (A free app that applies Dyslexia font letter-spacing and word-spacing settings), LIDT (The Letter Identification Test), TOC (The Test of Orthographic Choice), BAPPA-F (The Battery for Assessment of Plural Processing in Aphasia (Frequency)), and MAASST (The Macquarie University (MQ) Advanced Adult Spelling Test). A large red banner at the top of the screenshot displays the word 'motif' in a stylized font.

<https://www.motif.org.au/>

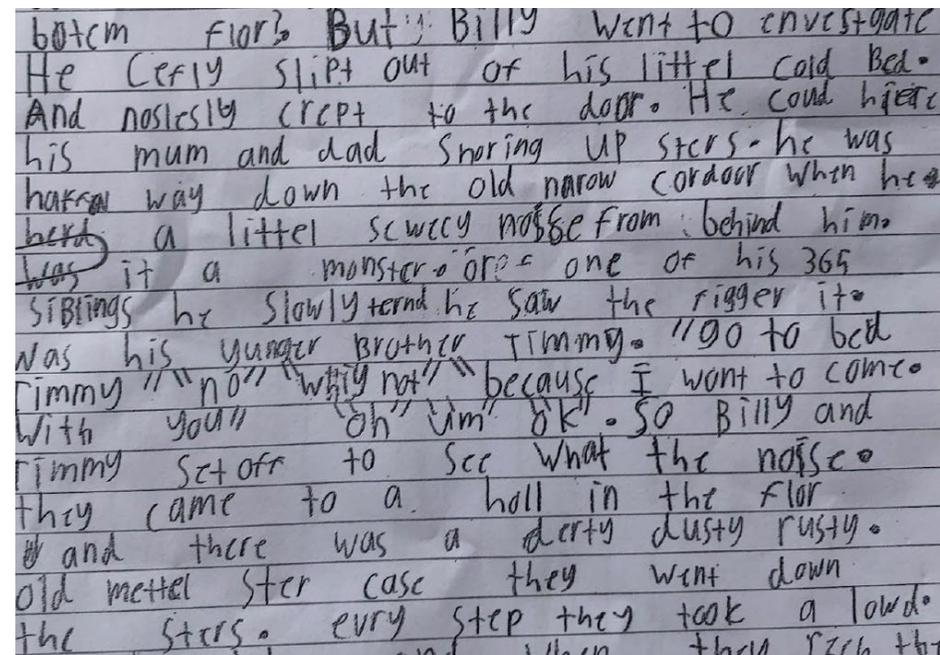

# How does the spelling compare?

- Examine students' spelling attempts on unknown words to indicate the extent to which the student is able to *spell phonetically, identify morphological structures, and remember orthographic patterns* (Moats & Tolman, 2019)

# How does the student's written expression compare to other test results?

- Collect and examine student's writing samples to determine how the student handles the multiple cognitive, linguistic, and letter formation demands of writing.

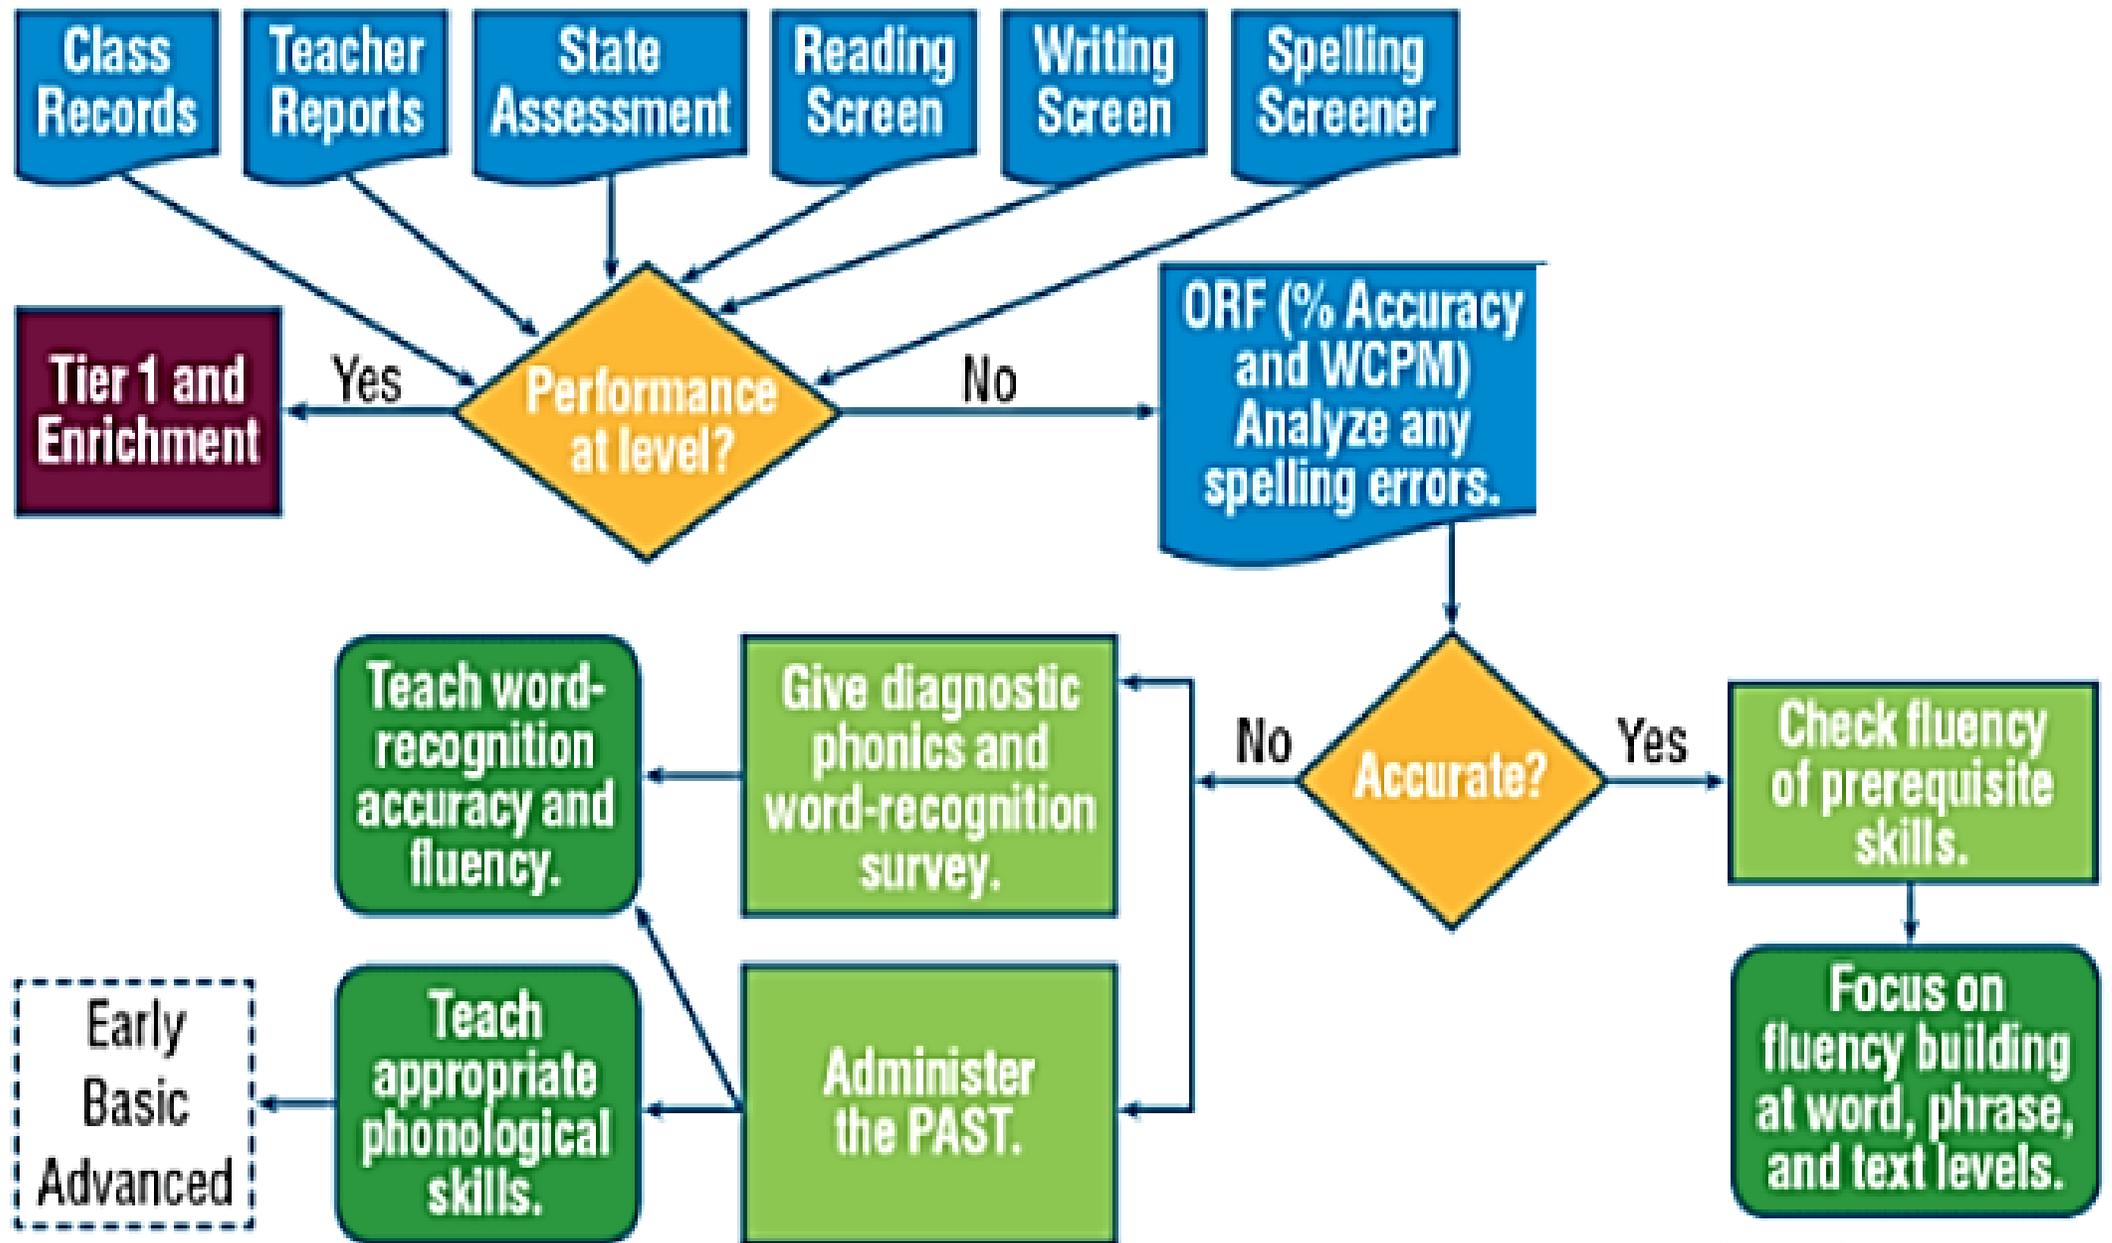

bottom floor. But Billy went to investigate  
He softly slipped out of his little cold bed.  
And nosily crept to the door. He could hear  
his mum and dad shoring up stairs - he was  
halfway down the old narrow corridor when he  
heard a little screechy noise from behind him.  
Was it a monster or one of his 365  
siblings he slowly turned he saw the rigger it  
was his younger brother Timmy. "Go to bed  
Timmy" "No" "Why not" "because I want to come  
with you" "Oh" "Um" "OK". So Billy and  
Timmy set off to see what the noise  
they came to a hall in the floor  
and there was a dirty dusty rusty  
old metal stair case they went down  
the stairs every step they took a loud

# Given the data, what instruction is needed?

- Analyze the student's responses from the screening and diagnostic measures given.
- Create a multicomponent instructional approach for interventions, if needed.

Reading	Writing
Most reading issues are due to lack of mastery of low level skills (e.g PA, Alphabetic skills)	Most writing issues are due to lack of mastery of transcriptions skills (handwriting, spelling and grammar). Second biggest issues is poor mental control

LETRS (Tolman & Moats, 2019)

**START**

# Managing motivation and engagement

- Motivation is a consequence of success
- Demotivation is a consequence of failure
- Intervention needs to be designed to ensure success in small steps
- “The amount of new information must be small enough that mastery could probably be induced in a few minutes.” (Engelmann and Colvin, 2006)

# Conditions for learning

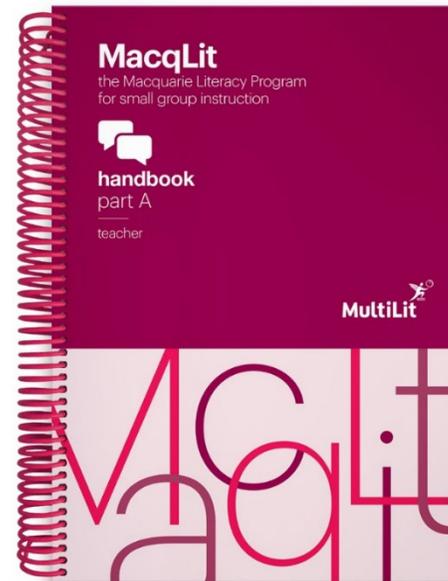

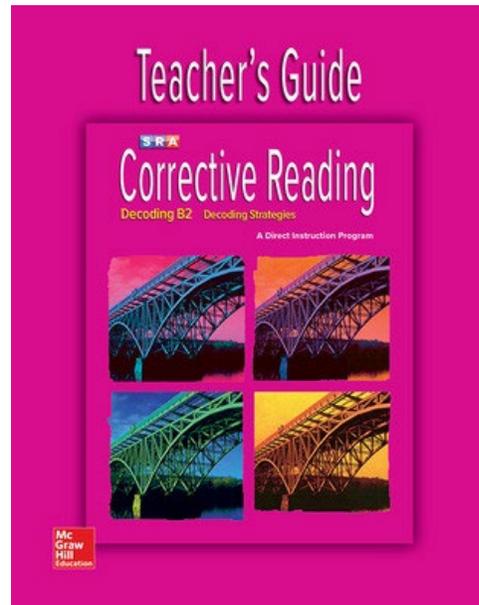

- Safe & dignified, calm and supportive
- OK to make mistakes – no put downs
- Guaranteed immediate success and visible learning
- Guaranteed mastery
- Full engagement
- Accountability – learner and teacher
- Fidelity and rigor

# Suggested intervention programs

Strong alignment with the five big ideas of Reading

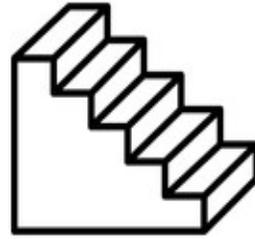

- **Duration** – length of intervention
- **Frequency** – 4-5 times/week
- **Intensity** – delivery of instruction

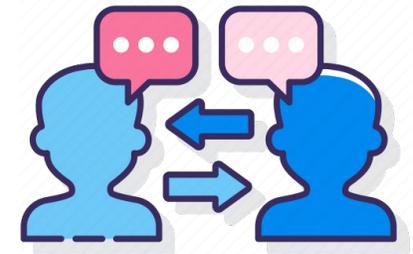

# Effective methods of delivery

Teacher-led  
Gradual release model

Small and manageable  
tasks

Active engagement  
Frequent responses

Cognitive science  
Positive reinforcement

Checks for  
understanding &  
Corrective feedback

Expectations of high  
mastery levels

# Common misconception

- **DI is scripted so anyone can do it. It is foolproof.**

**FALSE**

DI can be butchered. It can be made boring

DI requires months of practice before lesson delivery is mastered

- **Common mistakes:**

Delivered too slowly. The pace needs to be as rapid as possible without leaving anyone behind. Learning needs to be maximised.

Allowing non-response. Every student needs to be responding on cue, at the same time, all the time.

**FUN.**

Time is short!

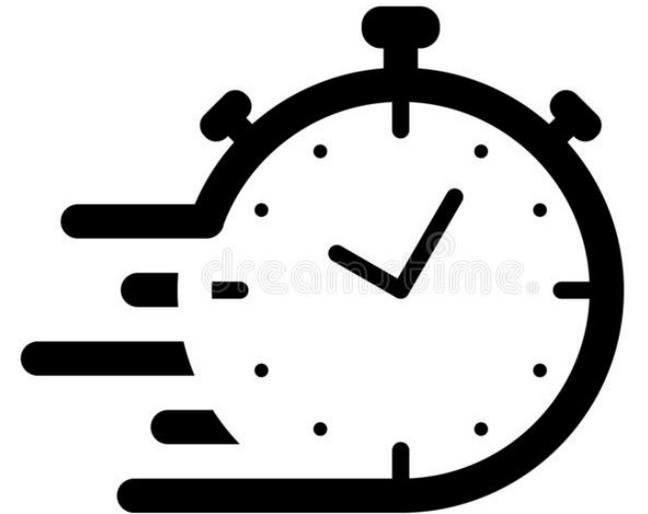

# Time is precious

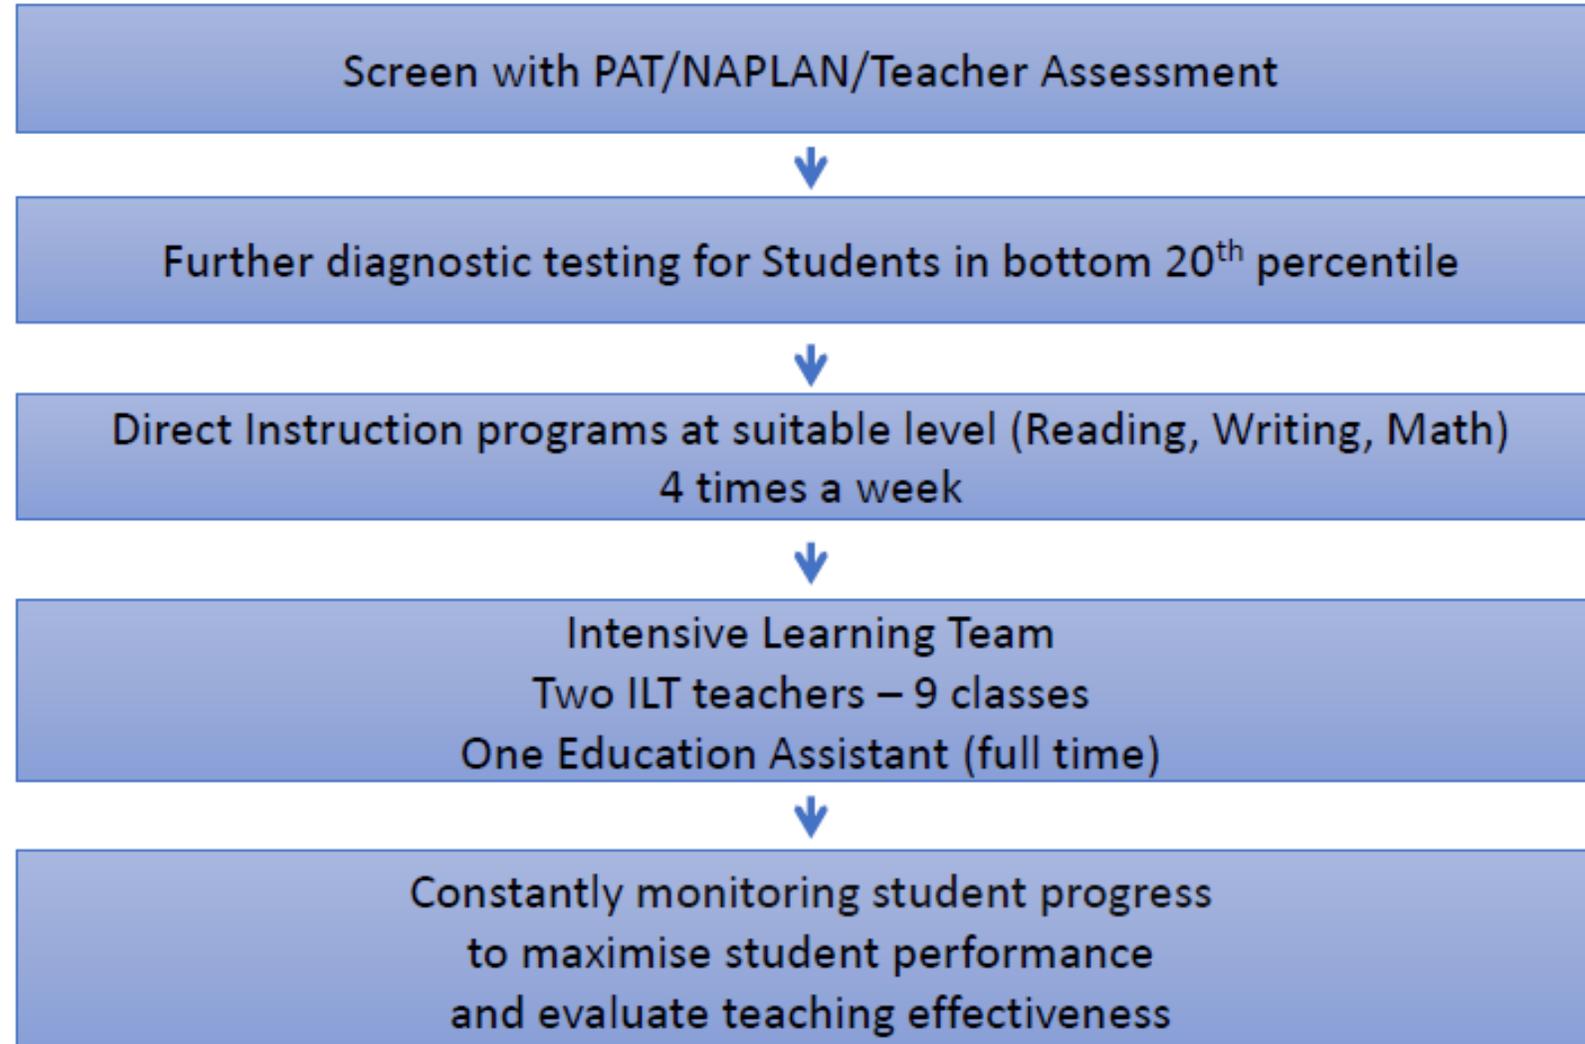

- Identify as soon as possible
- You must test – if you don't know, you cannot help
- Implement intervention as soon as possible
- Implement as intensively as possible
- *Go early, go hard, test often*

**“74%** of children who are poor readers in the third grade remain poor readers in the ninth grade.”

(D. Francis, S. Shaywitz, K. Stuebing, B. Shaywitz, & J. Fletcher, 1996)

# Como Secondary College - intervention

# The Intensive Learning Team

Como Secondary College – 850 students

ILT +/- 40 students Year 7-9

Reading 4 x 1-hour classes

Spelling 4 x 1-hour classes

Math 4 x 1-hour classes

2 x Fulltime teachers

1 x Education Assistant

1 x Line Manager (HOLA)

# School requirements

Proactive rather than reactive

Budgeting

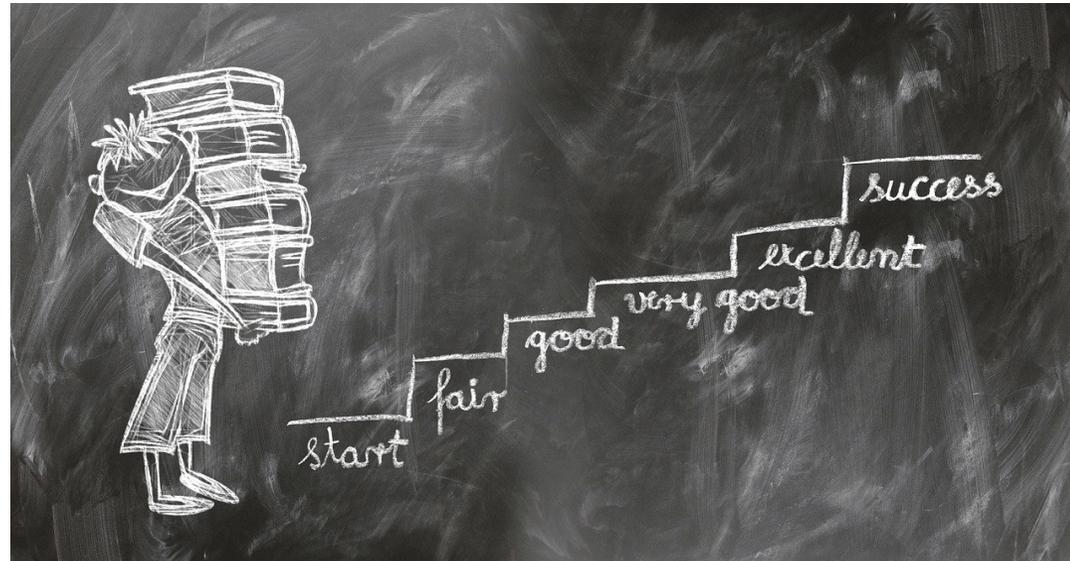

Timetabling

Staffing

# Key takeaways

1. Our responsibility
2. Rigor, resources, fidelity
3. Success begets motivation
4. You can make a difference

The image shows a Facebook profile page for the 'JCT Churchill Fellowship - Literacy Project'. The cover photo features the organization's logo, which consists of a blue map of Australia with a green arrow pointing to the southeast, surrounded by three blue orbital lines. To the right of the logo, the text 'Winston Churchill Fellow' is written in a large, teal font, with the tagline 'Learn globally, inspire locally.' in a smaller, blue, italicized font below it. A small 'Edit' button with a camera icon is located in the bottom right corner of the cover photo. Below the cover photo is a circular profile picture of a woman with blonde hair wearing a red jacket. To the right of the profile picture, the name 'JCT Churchill Fellowship - Literacy Project' is displayed in bold black text, followed by the handle '@JessCF2020' and the category 'Education website'. An 'Edit WhatsApp' button is positioned to the right of the name. At the bottom of the page, there is a navigation bar with links for 'Home', 'Groups', 'Events', 'Reviews', and 'More'. A blue 'Promote' button is also visible, along with search and menu icons.

Thank for attending!
