

Building Robust Tomorrows

6 - 8 August 2025

Trinity Wharf Tauranga

Panel Discussion:

The future of NZ standards and test methods

MBIE has developed technical co-ordination groups to provide strategic direction and better co-ordination within the construction industry with respect to standards and conformance infrastructure in New Zealand.

The Foundations and geotechnical investigations technical co-ordination group has reviewed a number of standards, including NZS4402.

CETANZ will be supporting the review, this panel discussion is aimed at starting a conversation to help inform stakeholders of the perspective of the Civil Engineering Materials testing community.
