

GREAT JOURNEYS TO KEEP NEW ZEALAND MOVING

Changing direction to be more responsive

Strategic responses

One Connected Transport System

Transform land transport system performance by integrating digital technology with physical infrastructure to create a safe, connected system that works for everyone

People-centred Services

Simplify our customers' lives and our partners' work with innovative services and experiences that make it easy for them to do what they need to

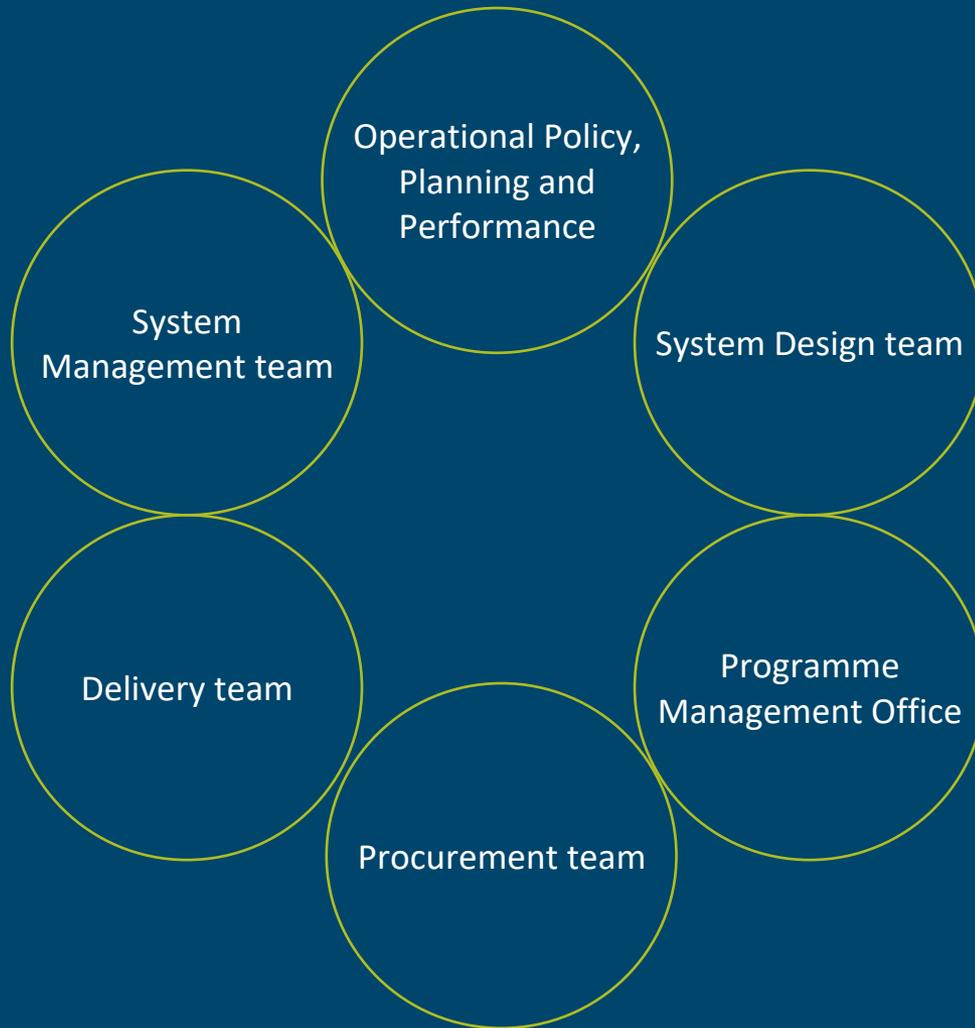

Partnerships for Prosperity

Unlock social and economic opportunities for customers, business and communities through targeted partnerships

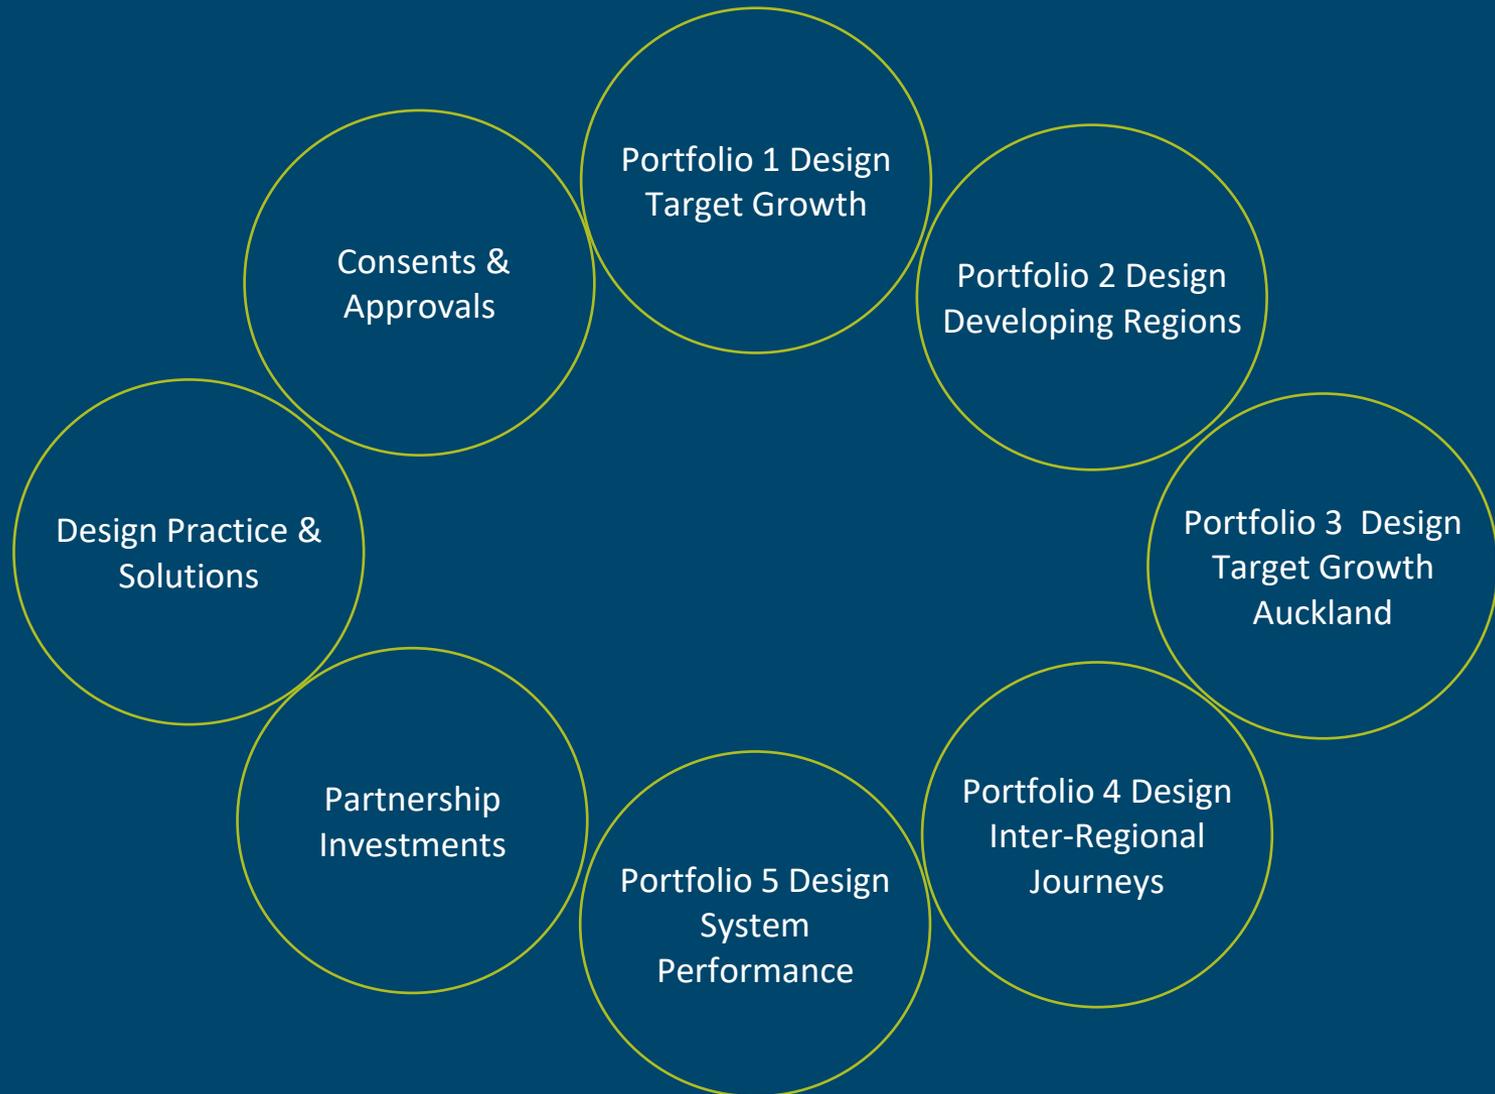

Operating model

System Design and Delivery Group

System Design

GPS – Government Policy Statement

- On 15th February 2018, the Minister of Transport, Hon. Phil Twyford, wrote to local government providing more information on the Government’s investment priorities.

Proposed investment:

- Is a safer system, free of death and serious injury
- Improves access to move towards more liveable cities and thriving regions
- Ensure the Land Transport System enables better environment outcomes
- Delivers the best possible value for money.

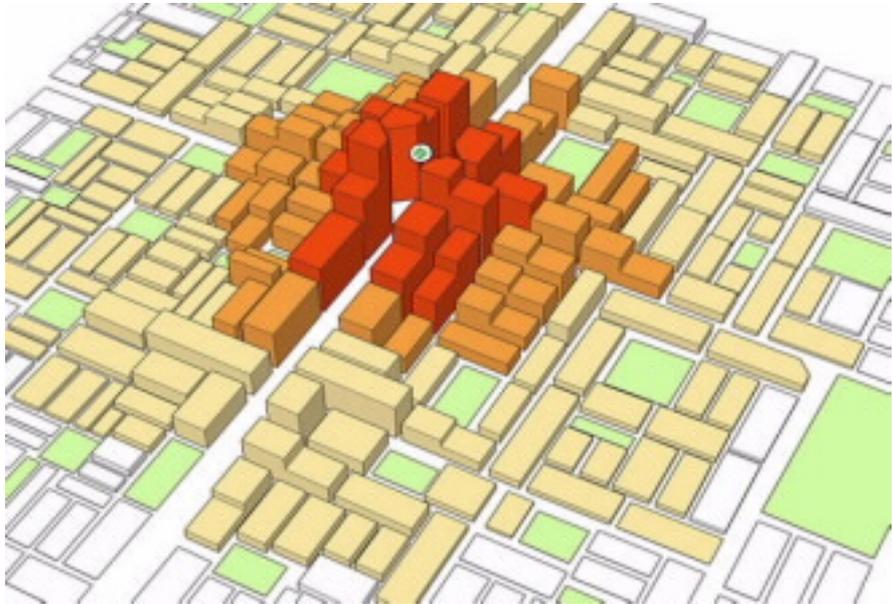

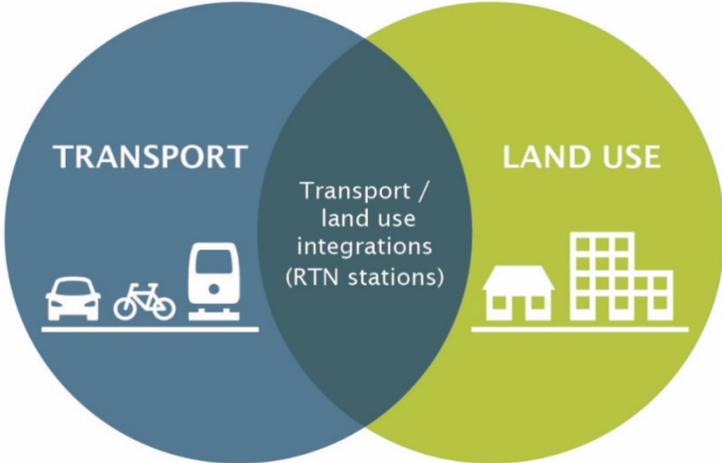

Likely themes:

- Mode neutral approach to transport planning and investment
- Incorporating technology and innovation into the design and delivery of land transport investments.
- Integrating land use and transport planning and delivery.
