Celebrating strength in our unity, supporting our community.

## Abortion –benefits of law reform and the unintended consequences

The Abortion Legislation Act passed in March 2020, the day before the Level 4 Covid19 lockdown. Come hear about the benefits we have seen so far as a result of both law reform and the pandemic, as well as some of the unintended consequences. We will also discuss the abortion standards of care, the inaugural national clinical guideline, the proposed national telehealth service, and starting a new practice in early medical abortion. Drs Wise and Knowles are experienced abortion providers, are on the Executive of APGANZ, and contributed as medical experts in the development of the Guideline
