

Road to Zero – New Zealand’s Road Safety Strategy and Action Plans

In this presentation I will talk about the challenge that we have in road safety in New Zealand and how our performance compares to other jurisdictions.

I will be covering the key elements of the New Zealand’s Road to Zero Strategy and Action plans including in the key interventions that have been modelled to deliver the 40% reduction in DSI and where they have been successfully applied in the New Zealand context.

I will be highlighting where more focus is required, and what people can expect in the road safety space in New Zealand moving forward.
