

Decarbonising Transport

Transportation
Conference

9–12 May 2021
Hilton Auckland

Title to be confirmed (presenting virtually)

Presentation overview coming

Wilson Tam is the transportation planning manager at the City of San Jose, California. His focus is on long-range transportation planning, policy development, land use transportation studies, and modelling. He served as the technical lead in making the City of San Jose one of the first in California to shift its transportation evaluation metric for development projects from automobile congestion to vehicle-miles-travelled, a state mandate aiming to promote environmental sustainability. With 12 years of experience in the practice of transportation planning, all in the state of California, Wilson strives to enhance community engagement, inter-agency collaboration, and public-private partnerships that

bring sustainable, affordable, and equitable mobility solutions to people of all ages and abilities. Wilson holds a Bachelor of Science in Civil and Environmental Engineering from the University of California, Berkeley, and a Master of Science in Transportation from Massachusetts Institute of Technology.
