

Industry-leading cloud connectivity

About MediRecords

MediRecords is used by doctors, specialists, allied health professionals, hospitals and government agencies across Australia.

An innovative, cloud-hosted electronic health record (EHR) and patient management system, MediRecords is accessible via web browser wherever you want (or need) to work. We take on hosting, security and software update duties. All you need to do is login and care for your clients.

Our integrations

MediRecords integrates with service providers to make it easy for healthcare providers to access relevant information and efficiently manage patient care.

- eRx Script Exchange
- Real time prescription monitoring
- Wolters Kluwer Medi-Span
- My Health Record
- The Australian Immunisation Register
- Medicare, DVA and ECLIPSE billing
- CoviU telehealth platform

We offer secure FHIR (Fast Healthcare Interoperability Resources) and API integrations, along with SNOMED-CT-AU coded clinical terminology. If you want to make more of your data, MediRecords is your ideal technology partner.

Key benefits

-  API connectivity
-  True cloud solution - No need for hardware, software installation or updates
-  Streamlined prescribing and investigation requests
-  End-to-end billing and claiming - maximise revenue and reduce rejected claims
-  Work from anywhere you can access the Internet
-  Ideal for telehealth and virtual care
