

ADVANCE INFUSION DELIVERY AND SAFETY WITH **IQ ENTERPRISE** CONNECTIVITY SUITE

Baxter's **IQ Enterprise** Connectivity Suite is the intelligence center that delivers synchronized infusion therapy support across your hospital.

Comprehensive interoperability helps you more easily capture, access and interpret infusion data to enhance therapy delivery, improve economic outcomes and help reduce the risk of preventable harm.

ADAPTS

to fit organizations of any size or structure

DISTRIBUTES

your drug library wirelessly to your Baxter pump fleet to ensure protocols are always up to date

DELIVERS

instant access to actionable information that helps optimize patient and financial outcomes

DEVELOPED

to meet the most rigorous cybersecurity testing

AT THE CENTER OF PATIENT CARE WITH ACCESSIBLE, ACTIONABLE INTELLIGENCE

As a key component of the **Evo IQ** Infusion Platform, **IQ Enterprise Suite** eliminates the need for dozens of complicated Continuous Quality Improvement (CQI) reports by delivering actionable, graphical reports that inform intelligent clinical decision-making.

AT-A-GLANCE INFUSION DATA

to simplify pump utilization insights to help identify errors and outliers for timely intervention

FLEXIBILITY

to analyze data across care area, location or health system

INFUSION STORY SOFTWARE

to help clinicians understand individual infusion practices at the deepest levels — including any limits hit, start and stop times, and any rate changes that occurred — and provide the information needed to drive continuous improvement

Infusion Story

ADAPTIVE SOFTWARE THAT UNIQUELY FITS YOUR ORGANIZATION

Only **IQ Enterprise Suite** can match the size and unique structure of your organization — from the smallest hospital to the largest integrated delivery network (IDN).

- Implement, customize and manage your infusion software using the unique Enterprise Hierarchy feature to manage drug libraries, run reports and make decisions in a way that matches your organization structure
- Expertly designed using the best practices in data visualization to deliver the most intuitive user experience
- **IQ Enterprise Suite** supports your entire health system by offering the highest capacity for connecting multiple devices on your hospital network to a single application

SECURITY YOU CAN RELY ON

IQ Enterprise Suite was built to meet the most rigorous cybersecurity certification to provide a higher level of protection for infusion data on your healthcare IT network.

- Leverages a multi-layered defense-in depth design approach with advanced cryptographic technologies
- UL 2900 validation process ensures secure product development processes, design and testing
