

Safe, Simple e-Prescribing

iQemo is a complete managed, cloud based electronic chemotherapy prescribing platform.

iQemo provides a safe, simple and efficient electronic prescribing platform that is securely hosted within the NHS N3/HSCN network.

It can be accessed securely from any NHS hospital in the UK without needing to install any software. Its modern, intuitive user interface allows users to easily accomplish their work wherever they are, within the hospital, on the ward, at the patient's side or on the move.

IMPROVE SAFETY

SAVE TIME & EFFORT

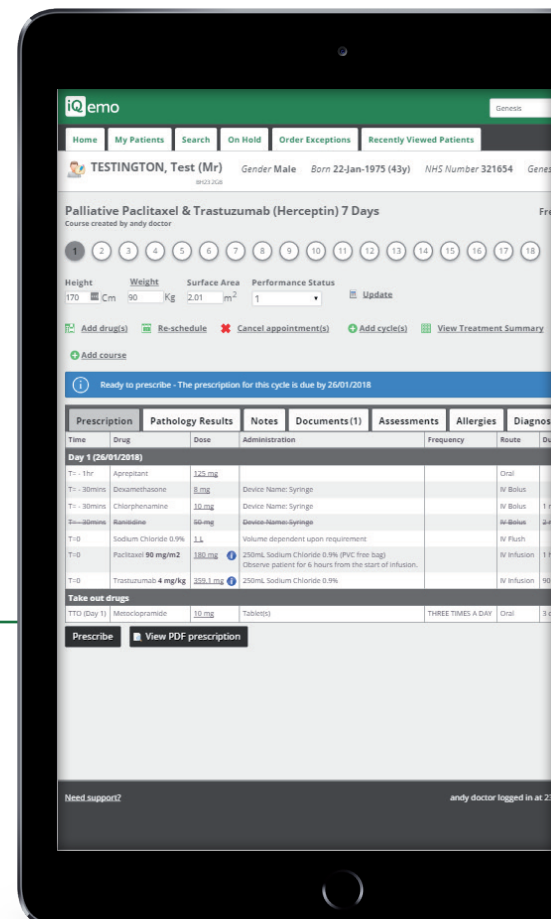

ANYTIME, ANYWHERE

Technology led by you

Our specialist chemotherapy module provides a safe, simple and efficient electronic prescribing and medicines administration solution.

We are constantly evolving our platforms to ensure that they remain at the forefront whilst prioritising ease of use, safety, accuracy, efficiency and governance.

How will iQemo benefit **your** organisation?

Low cost system hosting & maintenance

iQemo is externally hosted in our secure cloud platform. This means that hospitals don't need to purchase server hardware and database licenses to run the system. New system updates are provided and are deployed by iQ HealthTech without requiring IT department resources to deploy them.

No complicated setup required

iQemo is a web browser-based application that can be accessed on any hospital computer or tablet device without installing any software.

Continually evolving system

iQemo is continually evolving, driven by innovation fed by our user base. These updates are available to all iQemo subscribers.

Easy to adopt

To help hospitals adopt iQemo more efficiently our team of oncology trained pharmacists will setup all your regimens to match your hospital policies. The intuitive user interface ensures the system is easy to use and reduces system training. iQemo workflows are highly adaptable allowing it to complement existing hospital processes.

Business continuity

The iQemo cloud platform is built with high availability as a key requirement. The cloud platform has no single point of failure, is distributed across multiple secure data centres providing failover capability, ensuring that server or data centre outages don't affect iQemo users.

Securely access critical information anytime

Outstanding aftercare & support

Streamline and simplify your processes

Flexible to your requirements

Reduce costs and increase resilience through our secure cloud platform

Integrates with all healthcare systems and medical devices

"I am just amazed how easy this system is to use as compared to other e-prescribing systems I use."

DR ANDREAS MAKRIS
CONSULTANT CLINICAL ONCOLOGIST
Mount Vernon Cancer Centre
