

## A comprehensive suite of assessment systems

- Aged care
- Mental health
- Hospital care
- Children with special needs
- Disability services
- Palliative care

## Harmonised measurement

Systems share data items & decision support algorithms to create an integrated suite.

Speaking **One Language**  
for High Quality Care Worldwide

# Collect once - use many times

## One system to:

- Understand the needs of the person
- Assess the risk of adverse outcomes
- Develop a care plan
- Allocate resources
- Evaluate outcomes
- Generate quality indicators
- Compare caseloads & outcomes
- Share information among providers
- Facilitate continuity of care
- Report to regulators

## Extensive international use

- Allows a community of nations to share knowledge & expertise
- Provides the benefits of continuous international research
- Supports continuous upgrades as knowledge & practice improve
- Enables benchmarking of performance with other nations

**interRAI - A collaboration of health practitioners & researchers from 35 countries**

**Supporting the care of vulnerable individuals - all ages & all care settings**
