Telehealth for One Health Surveillance

-
- **Arindam Basu**
 - Anandhi Ramachandran
 - *Najeeb Al-Shorbaji*

What is One Health Surveillance System

- Obtaining data on diseases/health related states
 - Obtaining data on diseases/health related states
 - Storing Data
 - Analysing and Dissemination
- One Health Surveillance System is about integration
- Telehealth bridges provider-provider and provider-patient distances

Big Question of the Day

- How might we use Telehealth to Build a One Health Surveillance System?

Steps of the workshop

- Setting the scene
 - Najeeb Al-Shorbaji
 - Anandhi Ramachandran
 - Arindam Basu
- All Participants
 - Ideate and Converge
 - Discuss and Debate
 - Create Empathy Map

Outcomes of the workshop

- An Empathy Map as to how might we design a Telehealth driven One Health Surveillance System
- A Community of Practice to move this idea forward

Format of the workshop

- 0:00-10:00: Rapid introduction of the team, ice breaker, explanation of the big idea, team building
- 10:00-15:00 - IDEATE of the Potential Challenges & Opportunities integrating ONE HEALTH and TELEHEALTH
- 15:00-20:00 - Move around the room to CONVERGE ONE or TWO important challenge from the sticky notes
- 20:00-30:00 - Use the EMPATHY MAPs spread around the room to IDEATE solutions
- 30:00-40:00 - Move about the room to CONVERGE ONE or TWO key areas
- 40:00-50:00 - Final discussions, future team building, conclusions
