BETTER HOSPITAL COMMUNICATION

-  Improve patient safety
-  Increase hospital efficiency
-  Boost staff wellbeing
-  Minimise medicolegal risk

Medtasker is an integrated mobile communication and task management platform for hospitals that ensures the right message is delivered to the right person every time.

MEDTASKER BENEFITS

Improve Patient Safety

Medtasker addresses:

- The risks and inefficiencies of pagers and unclear escalation pathways.
- The needs of Hospital at Night programs.
- The challenge of reliably calling the right team to Codes and MET calls.
- Delayed or missed care due to critical information not being received by the appropriate clinician.

Boost Staff Wellbeing

Medtasker addresses:

- Wasted time trying to contact the right person.
- Interruptions to current activity.
- The stress of unsustainable and uneven workloads.
- Overhead noise of paging and code calling.

Increase Hospital Efficiency

Medtasker addresses:

- The lack of visibility into and inability to manage staff workloads.
- Poor coordination due to multiple siloed systems.
- Missed revenue due to poor capture of compensable patient services.

Minimise Medicolegal Risk

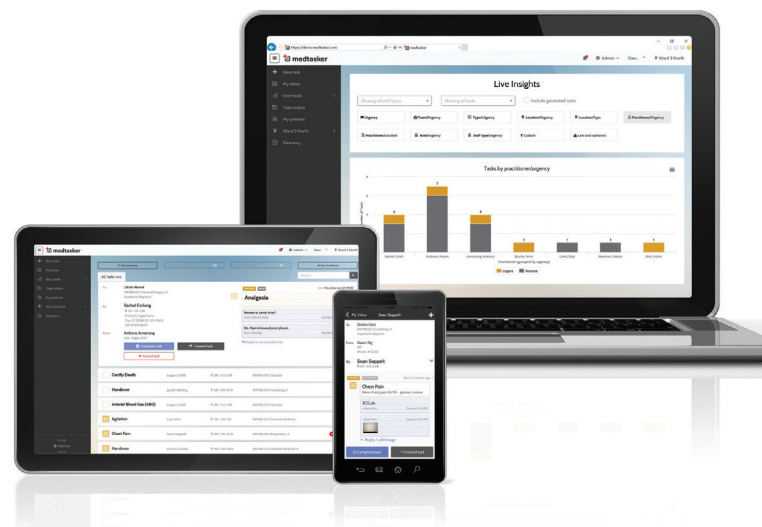

Medtasker addresses:

- Inappropriate storage of patient information and clinical photos on personal devices.
- The unsanctioned use of WhatsApp and SMS.
- Issues with capturing and auditing clinical tasks and escalation activities.

“

It's absolutely brilliant. As well as improving patient flow and efficiency, Medtasker's simple usability has enabled employees to adapt quickly and enjoy greater visibility of patient referrals and more streamlined collaboration between departments.”

Dr Paul MacIntyre,
Clinical Director of Acute Medical Services,
Royal Hobart Hospital
