

AT A GLANCE

SIMULATED WORKPLACE

Mimic the coding and digital health workplace with health records and systems, questions, answers and feedback.

EASE OF COURSE CREATION

Reduce the effort of creating and maintaining your courses.

IMPROVE CONSISTENCY

Standardised industry tested question and answers to ensure assessment consistency across the industry.

PART OF AN INTERNATIONAL COMMUNITY

Engage and contribute to quality decisions and continuous improvements to the learning platform.

RESEARCH OPPORTUNITIES

TECHNOLOGY NEUTRAL

eHR Online Learning (eHRoL) designed to build digital health workforce capacity.

Replicates the real-world EHR and coding experience.

eHRoL enables easy online access to upskill existing staff, and is a solution to support education providers.

The tool is globally compatible and can be configured for any code system or version, local coding rules or requirements.

The Learning Management System designed for digital health education. Organisations get:

- extensive student and activity reporting
- shared community content and governance decision making
- access anytime from anywhere

Collaborative cloud based tool which supports sharing, identification of best practice at reduced overheads for all users.

KEY FEATURES

- **ADMINISTRATION PORTAL**
Setup your own organisation, groups or individual students and determine the best cases to be delivered to them.
- **LEARNING MODULES**
eHROL uses quality online learning for clinical coder training. Includes staged learning modules, practice and assessment modules, answers and feedback.
- **QUALITY CONTENT**
The system holds patient and record information. It includes correct codes and common mistakes made for each version of the classification.
- **LEARNING ADVICE PORTAL**
Provides access to online feedback for correct and incorrect coding answers.

CONTACT US

If you would like to find out more about how eHROL can be used for your educational or health organization contact us for any queries or for a product demonstration.

GeHCo

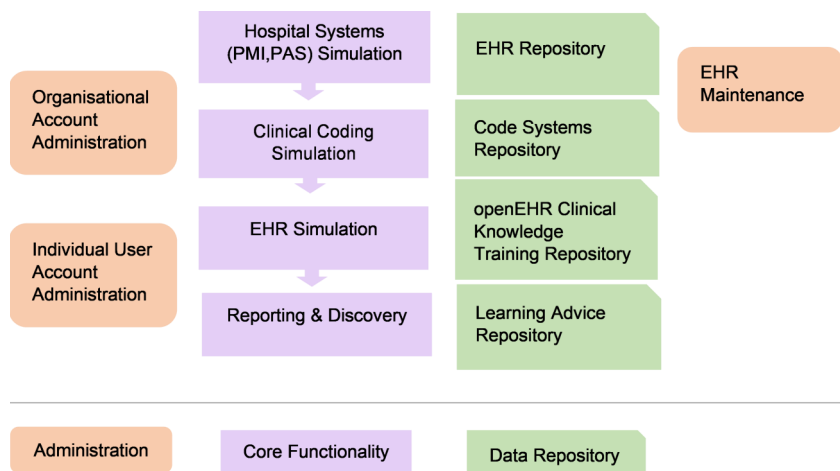

eHROL™

Who will benefit from eHROL?

- Digital health education providers and organisations.
- Designers and deliverers of clinical coder, Health Information Management and Digital Health training.
- Government personnel seeking to develop the digital health workforce.
- Individuals wishing to build their skills in digital health.
- Researchers

Platform Overview

eHROL is delivered through a cloud-based, secure, online portal with these key components:

Why use eHROL?

- Access materials, including EHRs, for students to practice:
 - Clinical coding
 - EHR design and use
 - Data and information system design, including openEHR
 - Use of relevant code systems, including SNOMED CT™
- Availability of quality assured competency based assessments.
- Reduce time to manage coding course exercises and assessments.
- Reduce the time required to maintain course content.
- Improve the quality and consistency of coding course exercises and assessment through cloud sharing.
- Manage student cohorts directly without external intervention.
- Provides resources for education providers.
- Monitor and obtain report of student progress.
