learners per year

60,000
instructors supported

100 MILLION
sessions & views enabled

WAYS TO USE ECHOPOLL

Online & Blended Learning   Academic Contents

Employee Training   Exam Proctoring

Certification Maintenance   Self-Paced Assignments

Content Management   Live Polling

Echo360 has been the gold standard for over 20 years in educational polling, ensuring learners and employees can engage anywhere, anytime with the materials they need to achieve. Over that time, we have innovated and refined learning engagement to now deliver the most effective polling solution available for education and business markets around the world.

POWERPOINT INTEGRATION

Add interactivity to your existing presentation and create engaging experiences with the click of a button. Create, present, and collect results online–with our industry-leading PowerPoint integration. That means no time spent recreating presentations, and more time focused on connecting with learners.

LIVE POLLING

Create polls on the fly to measure learner engagement and understanding. Access all results in your account online, providing information on where learners need additional help or support.

MOBILE RESPONSE

Optimise the classroom experience for small-screen viewing, making it easy for learners to engage inside or outside their physical learning environment. We offer the ability to toggle between video feeds and the class presentation, so learners can connect, no matter where they are or what device they use.

GUEST ACCESS

EchoPoll offers Guest Access for users which provides more flexibility, anonymity and reach for instructors, administrators and learners. Easily control the number and type of participants in your live polling session who also have the ability to remain anonymous within EchoPoll.

GAMIFICATION

Gamification is about the desire and willingness to do something which is why it can be an excellent approach for fun yet impactful learning. Challenge your learners by inserting them into different scenarios with teams and wagers.

WHITEBOARD

The interactive whiteboard feature in EchoPoll is just one of the many tools built-in to animate learner engagement. When paired with virtual chat, videos, and competitions, you can create a truly interactive, inspired learning experience for everyone, anywhere.
