

INFANT NUTRITION

FEEDING THE FUTURE 2026

MAJOR SPONSOR

Joint venture of AAK & IFF

At the INC Conference, Advanced Lipids will present The Fat Factor in Infant Safety, our presenter Nan Ma will highlight how infant formula oils are sourced, produced, and controlled to meet the highest safety standards. Special emphasis is placed on regulatory compliance, quality assurance, and risk management, demonstrating how rigorous controls across the supply chain help ensure product safety, consistency, and consumer trust.

INFANT NUTRITION

FEEDING THE FUTURE 2026

MAJOR SPONSOR

novonesis

At Novonesis, we are dedicated to improving health through science. We focus on advancing Human Milk Oligosaccharides (HMOs), delivering innovative solutions that support infant health and development. Combining scientific excellence with cutting-edge research, we push the boundaries of bioscience to give every infant the best possible start in life.

During our session, speaker Nicola Prochazkova, Phd – Science Lead, Early Life and Specialised Nutrition, will present the insights from two decades of HMO development within Novonesis, and current research on HMOs, highlighting both mechanistic insights and findings from clinical studies. We will also tap into the emerging science indicating health benefits of HMOs beyond infancy.

INFANT NUTRITION

FEEDING THE FUTURE 2026

MAJOR SPONSOR

Recent critical industry events have underscored the paramount importance of robust contaminant control in Infant Formula ingredients. Bunge, a pioneering expert, boasts a long track record in ensuring the purity and safety of Infant Grade Oils, including our flagship product, Betapol OPO. We further demonstrate our leadership by having invented the industry standard for 3MCPD GE analysis in vegetable oils. Join our essential session for insights into evolving legislation, Bunge's sophisticated analytical and control methods, and proactive mitigation strategies like product reformulations. Discover how our innovations directly contribute to safeguarding the health and safety of our youngest consumers
